

# GERMANY'S SEA TERROR CAMPAIGN IN FULL SWING

## Long Campaign to Capture Villa Expected by Gen. Pershing.

### TRIPLICATE OF CRISES.

Three Foreign Issues Confront Wilson.

German Submarine Controversy in Stage Demanding Prompt Action.

Belin Believed to be Tampering with Mexicans to Involve America.

But not Least, is Britain's Restriction of Our Commerce.

JOHN GALLAN O'LAUGHLIN, IN WIRELESS DISPATCH.

WASHINGTON, Bureau of THE TIMES, March 26.—President Wilson is facing issues which have consequences of grave importance to the American people.

(1) The submarine controversy with Germany.

(2) The imposition of additional restrictions upon American commerce with Britain.

(3) The Mexican situation.

Immediately after President Wilson and the White House he said in connection with a foreign question facing for solution that he had a

### DAUGHTER BORN TO THE SAYRES.

Tiny Miss will be Named Eleanor Axon for Her Late Grandmother.

(BY A. P. NIGHT WIRE.)

PHILADELPHIA, March 26.—A daughter was born to Mr. and Mrs. Francis Bowes Sayre here today. She is the second grand daughter of President Wilson and will be named Eleanor Axon Sayre, for Mrs. Sayre's mother. Mother and child were reported tonight as doing well. Mrs. Sayre has been in this city visiting her aunt, Mrs. A. W. Howe, a sister of the President, for several weeks. The President wished his congratulations.

"single-track mind" and that he could not consider other foreign matters at the same time. The experience of the war has shown the President the direct relation of many foreign developments to each other and the necessity of handling one in such a way that it will influence the settlement of the others. Thus, the submarine controversy with Germany, according to the German contention, is the direct result of the failure of neutrals to insist upon observance of principles of international law by the allies.

GERMAN TAMPERING.

It is known also that German agents have tampered with the Mexican revolutionists. So the President, in considering the submarine crisis with Germany, for it has become such as a result of the torpedoing of the steamships Englishman and Sussex, must give attention to the effect of whatever action he may take upon the situation in Mexico and the internal situation of the United States. It is imperative for him to make determined representations to Great Britain in respect to the seizure of American ships.

(Continued on Second Page.)

## NO WARNING TO SUSSEX, TORPEDO PLAINLY SEEN.

### Official Statement Issued in Paris Disputes Mine Theory.

Washington Hears that American Survivors are Certain Submarine was Responsible for Disaster that Cost Lives of United States Citizens—Three More Steamers Sunk with Loss of Life.

(BY ATLANTIC CABLE AND A. P.)

PARIS, March 26 (12:00 midnight).—There is no matter of doubt whatever that the channel steamer *Sussex* was torpedoed without warning," says an official statement issued here tonight, based on affidavits made by American survivors.

John Hearley, Albany, N. Y., a press association correspondent, makes the following statement:

"On Friday, about 9 o'clock in the afternoon, while a dozen Americans were watching from the bridge a great explosion occurred in the fore part of the vessel without warning and three Americans, at least, saw the passage of the torpedo."

"W. J. Culbertson says that he saw Miss Baldwin on the deck, wounded in the head. Samuel Bemis of Harvard University said the explosion occurred without the slightest warning and that many persons were thrown into the sea; that some were killed and some wounded; that he saw bodies on the bridge of the *Sussex* and that while being rescued he saw two persons drown."

These denials are confirmed by the American men and American women who were passengers aboard the *Sussex* and whose names follow: John Hearley, Albany, N. Y.; Mrs. Lillian Harde, New York; Mrs. Clarence Handyside, New York; Mrs. Gertrude Warren, St. Louis; Miss Gertrude Barnes, New York; Mr. and Mrs. Bear, Mrs. Dorothy Hilton and daughter, New York; Samuel E. Lewisburg, St. Louis; Daniel Sargent, Wellesley, Mass.; Charles and George H. Crocker, Jr., Newburg, Mass.; Wilbur G. Penfield, Hudson, Wis. and Miss Alice Ruiz, Lyon, Colo. These last five were working in the interest of the American Red Cross. A certain number of the injured have been taken to Dover.

## CLERK INHERITS THREE MILLIONS.

Youth Working at Small Salary at Seattle Comes Into Fortune.

(BY A. P. NIGHT WIRE.)

SEATTLE (Wash.) March 26.—Harold Richard Clements, 19 years old, who has been working in a department store here at a small salary, has been notified by Arthur Payne, an attorney of Louisville, Ky., that he has inherited the \$3,000,000 estate of his grandmother, Mrs. Mary Clements, who died there last Wednesday. Young Clements is the son of Harry Curtis Clements, formerly president of the Denver Traction Company, who died nine years ago. When Mr. Clements died he left the bulk of his estate to his mother, only a small allowance going to his son, young Clements said tonight.

## AEROPLANES LOST IN SEA BATTLE.

### THREE AIRCRAFT BROUGHT DOWN BY GERMANS.

Three Ships, Two of Them Treated Vessels and One British, are Also Reported Destroyed—Flight Occurs in the Neighborhood of the Schleswig-Holstein Coast.

(BY ATLANTIC CABLE AND A. P.)

LONDON, March 26.—Three British aeroplanes which took part in a raid on German airship sheds in Schleswig-Holstein yesterday are missing. Two German patrol vessels were sunk and a British destroyer is believed to have been lost.

The following official statement was issued tonight:

"An attack by British aeroplanes was delivered yesterday morning on German airship sheds in Schleswig-Holstein, eastward of the Island of Sylt. The aeroplanes were conveyed to their rendezvous close to the German coast by an escorting force of light cruisers and destroyers under Commodore Tyrwhitt."

"Three of the aeroplanes which took part in the attack are missing. The destroyer *Medusa* was in collision with the destroyer *Lacock* and it is feared that in the stormy weather which prevailed last night the *Medusa* may have been lost. But no survivors are felt as to the safety of the crew. Two German armed patrol vessels were sunk by our destroyers."

"No detailed report has yet been received, but from Danish press dispatches it would appear that this operation, which was carried out within the enemy's waters, achieved its object."

The *Lacock*, 280 feet long, was built in 1914 and displaced 955 tons. She was armed with three four-inch guns and two torpedo tubes. Her normal complement was 100 men. The latest available British navy records give no destroyer *Medusa*.

Dispatches from Copenhagen, Denmark, to the *Berliner Tidende* says Reuters' Copenhagen correspondent reports a great naval battle between the German and British fleets some three miles off the Grassy Lightship at midnight today.

A dispatch to the Exchange Telegraph Company from Copenhagen says the German armed trawlers sunk by the British outside Sylt Harbor were named *Braunschweig* and *Otto Rudolt*.

## GERMANS SUFFER NO LOSSES.

Not less than three British aeroplanes, among them a fighting aeroplane, were brought down today by German guns and about the Island of Sylt, during an air raid on Northern Schleswig, according to a German official communication issued tonight.

The *Lacock*, 280 feet long, was built in 1914 and displaced 955 tons. She was armed with three four-inch guns and two torpedo tubes. Her normal complement was 100 men. The latest available British navy records give no destroyer *Medusa*.

Dispatches from Copenhagen, Denmark, to the *Berliner Tidende* says Reuters' Copenhagen correspondent reports a great naval battle between the German and British fleets some three miles off the Grassy Lightship at midnight today.

A dispatch to the Exchange Telegraph Company from Copenhagen says the German armed trawlers sunk by the British outside Sylt Harbor were named *Braunschweig* and *Otto Rudolt*.

## GUARD SLAIN BY A CONVICT.

LEAVENWORTH (Kan.) March 26.—A guard in a guard in the Federal penitentiary here, was stabbed to death by Robert F. Stroud, a convict, in the prison mess hall at noon today. With 1500 prisoners looking on, Stroud plunged a case knife into the officer's heart. Stroud was disarmed without resistance. There was no disturbance among the convicts.

## MAY TAKE MANY MONTHS TO END BANDIT'S CAREER.

### Outlaw Now in Territory From Which He Will be Difficult to Dislodge.

Enough American Troops are Concentrated in Mexican Territory to Deal with Any Emergency that may Arise. More Cavalrymen Have Arrived at Border to Patrol the Line of the Rio Grande.

(BY A. P. NIGHT WIRE.)

DEL RIO (Tex.) March 26.—Increased uneasiness was felt in this section today when it was learned positively that nearly 1000 Mexican soldiers have congregated at a dozen places within thirty miles of the border. Three hundred soldiers of the Twenty-fourth Infantry arrived here today for permanent patrol.

QUERETARO (Mex.) March 26.—Gen. Pedro Gomez and twenty-two others, all members of Villa's band, were killed in a battle today in the neighborhood of Laguna and Dinamita. In this action between government forces and bandits, ten prisoners also were taken and summarily executed. This information came in a message to the Minister of War, Gen. Obregon, who was informed that the campaign against the Villistas was being waged with the utmost vigor.

COLUMBUS (N. M.) March 26.—A speedy termination of the American expedition into Mexico is not looked for by Gen. J. J. Pershing, commanding the forces in the field, according to advices received here today.

It was asserted that, following a staff conference, Gen. Pershing announced that the people of the United States should not place too much confidence in reports that Francisco Villa, the factional leader, whose command attacked this town several weeks ago, has been bottled up, either by the American forces, or by Mexican troops. The nature of the country in the vicinity of Namsiquipa, where Villa is supposed to be, it was pointed out, renders it difficult for any force to surround effectually a small band in the mountain passes. The almost impassable trails offering a means of escape.

While it was understood that Gen. Pershing does not attempt to predict the length of time American troops may occupy Mexican territory, it was intimated that the period may extend into months.

### ENOUGH TROOPS IN FIELD.

Other reports also received today from unofficial sources indicated that with (deleted) troops in the field American military authorities believe a sufficient number of men of all arms of the service have been concentrated at La Ascension, Casas Grandes, Colonia Dublan and other American field points to meet the exigencies of any emergency that may arise. Several thousand negro infantrymen and two squadrons of cavalry have arrived here from Fort D. A. Russell, Wyo., Leavenworth, Kan., and Sheridan, Ill. The cavalrymen will assist in the border patrol and the infantry will garrison Columbus. Capt. Richmond Smith, in command at Boca Grande, reported by wireless that his men had found and buried the body of Cook O'Neill, who was murdered by Villa's company on its way to attack Columbus.

## VILLA ESCAPES TRAP SET BY GEN. CARRANZA.

Gen. Pershing, Now 250 Miles South of the Border, Wires the Bandit has Broken Through the de Facto Lines and is Making His Way to the Guerrero Mountain District—Col. Dodd is in Hot Pursuit.

(BY A. P. NIGHT WIRE.)

SAN ANTONIO (Tex.) March 26.—Francisco Villa has escaped from the Mexican troops that had checked him near Namsiquipa, and there is little reason to believe that he was even weakened by the fighting directed against him by the de facto government troops. Reports last night from Gen. Pershing indicated that he had been severely defeated. No Americans were engaged, and the fact that Villa made his way through what was described as an encircling line of Mexican troops, was taken to indicate that he was the victor.

Unless fresh Mexican forces are sent to meet Villa, there appears no reason why he should not make his way unimpeded into the mountains of the Guerrero district, toward which he appears to be moving.

Col. Dodd is commanding the advanced column that are riding hard after Villa and his men. Gen. Pershing has divided his forces so as to provide supporting columns along the thinly-stretched line of communication from his most advanced base at El Valle.

From El Valle another line is being maintained back to Casas Grandes from where communication with the border is maintained.

Gen. Pershing himself is somewhere south of Casas Grandes, directing the work of holding together his forces and directing, so far as possible, the operations of Col. Dodd. Cavalry is being sent along the line of communication with El Valle, where a detachment of infantry is stationed.

Three aeroplanes are at El Valle and will be used in scouting as well as in providing supporting columns along the line of communication. That part of Mexico for almost a week have subsided, which, according to Gen. Pershing, have made effective assistance by them impossible. Of the eight machines that went into Mexico two are still out of commission.

## LOWER CALIFORNIA IS NOT EXCITED.

(BY A. P. NIGHT WIRE.)

SAN DIEGO (Cal.) March 26.—Mexican residents of the northern district of Lower California have no ill-feeling against Americans because of the movement of United States troops across the border in pursuit of Francisco Villa, according to passengers who arrived here from El Paso today on the British steamer *Grinya*. The passengers, sixteen in number, declare conditions in Lower California are practically just as they were a year ago.

### SUMMARY.

THE SKY. Clear. Wind at 5 p.m., light, 5 miles. Thermometer, highest, 60; lowest, 40; forecast: Fair. For complete weather report see last page, Part I.

THE CITY. Three hundred-headed buses found in his blaring horns and the sound of a woman.

Gen. Pershing presented a powerful plea to the American people to support the bill in Congress providing for a railroad to tap the oil fields of Colorado and Arizona.

The American-Hawaiian Steamship Company announced the steamers *Florence* and *Humboldt* have been chartered to resume service.

The Chamber of Commerce made plans to support the bill in Congress providing for a railroad to tap the oil fields of Colorado and Arizona.

A youth confessed he stole four automobiles, forged checks and did other things, all in two months.

A visitor who has feminine correspondence in many lands voiced a bitter protest against European censorship of mail.

SOUTHERN CALIFORNIA. A noted marine philanthropist at Pasadena said that the war will give freedom to the people.

Long Beach is considering an ordinance to make laundries laundries a heavy tax.

PACIFIC SLOPE. Detective registered 100 million the anti-dope law.

WASHINGTON. Newspaper men say the War Department more trouble than help.

HOW TO READERS: It is a mistake to jump at the wrong conclusion that all, or even the greater part, of the news of the day is contained in the summary. The summary is a guide to the news of the day.

## THREE MORE STEAMERS SUNK BY SUBMARINES.

(BY ATLANTIC CABLE AND A. P.)

ARSENAL, March 26.—The British liner *Minneapolis* was sunk in the Mediterranean last Wednesday by a submarine, according to Capt. Bibby of the British steamer *Leicester*, which has arrived here from Rangoon.

Capt. Bibby reports that while in the Mediterranean last Wednesday he received a wireless call for help from the *Minneapolis*, which said the steamer had just been torpedoed and was sinking.

The *Leicester* went out at full speed to the assistance of the *Minneapolis*, but arrived too late, the vessel having sunk. The fate of the crew was not known to Capt. Bibby.

The *Minneapolis* was a steamer of 11,443 tons gross. She was built in 1900 at Belfast and was owned by the Atlantic Transport Company. Late shipping records do not give the movement of the vessel, which probably was in the British government service. The *Minneapolis*, after the *Minneska*, was the largest of the "Minnie" steamers in the Atlantic Transport line fleet. She was built in 1900 and carried passengers as well as freight. The steamer was a popular one with the ocean-going public.

The *Minneapolis* was one of the steamers which did rescue work when the *Uranium* line steamer *Volturno* was burned at sea in 1912.

ST. CECILIA SUNK.

LONDON, March 26.—The British liner *St. Cecilia*, from Portland, Me., March 11, for London, has been sunk, according to a dispatch to Lloyd's from Dover. The crew was saved.

The steamer *St. Cecilia* was a comparatively new vessel, having been built at Greenock in 1913. She was owned by the British Overseas Steamship Company of Glasgow.

Lloyd's reports that the British liner *Maya* Bridge has been sunk. The crew has been landed. She sailed from Philadelphia on March 14, for Hull.

## SIX LIVES ARE LOST IN COUNTRY CLUB FIRE.

(BY A. P. NIGHT WIRE.)

SAN ANTONIO (Tex.) March 26.—Six persons lost their lives early today in the burning of the fashionable San Antonio Country Club. Five of the victims were guests at the club, which was the scene last night of several week-end parties, bringing together a large number of persons prominent in social and business circles of the Southwest.

The dead are:

MR. AND MRS. J. B. WALTHALL, San Antonio.

JUDGE J. E. WEBB, San Antonio.

HOMER JONES, San Antonio.

MRS. MACO STEWART, Galveston.

ELLEN COCKRELL, maid at the club.

The fire had its origin in a collection of paint stored in the basement of the three-story frame clubhouse. It spread quickly to a stairway leading to the first floor and rapidly communicated to the other two floors above. About fifteen guests asleep in the building had narrow escapes, many jumping from the second-story windows, so quick was the spread of the flames.

RETURN AFTER GETTING OUT.

Mrs. Stewart, who was spending her first night at the club as the guest of Mrs. Cora Ogden, had escaped from the burning building, but with Homer Jones started back to rescue Judge Webb, whose hearing was affected and who they feared, would not hear the alarm. The three were caught in the dense smoke and went to their death together.

James Walthall, 45 years old, was formerly Attorney-General of Texas. His wife was a bride of twelve months, formerly Miss Mary Carson of Indianapolis, Ind.

Judge Webb was a prominent member of the bar.

Mrs. Stewart was the wife of Maco Stewart, president of the Title Guaranty Company of Texas, whose home was in Galveston. She came here for a week's visit with friends.

The flames were discovered by the steward of the club, who went into the grill shortly after a number of guests had left the first floor for their apartments upstairs. The steward attempted to quench the flames with fire extinguishers. This proved insufficient, so he summoned the guests, who still were awake and who aided in alarming the others in the building.

MANY JUMP.

A number of the guests at the club escaped by jumping from the veranda roof.

The club and its contents were valued at \$45,000 with \$25,000 insurance.

Six charred bodies, burned beyond recognition, were taken from the ruins today, identification having been established by dentistry work and jewelry worn by the victims.

Search for bodies began at dawn. The building burned like tinder and was consumed in less than one hour.

RAILROAD SHEDS BURN.

(BY A. P. NIGHT WIRE.)

HOUSTON (Tex.) March 26.—Loss estimated at more than half a million dollars was caused here today by a fire which started in the cotton sheds of the Missouri, Kansas & Texas Railway and spread to nearly a dozen other buildings and forty freight cars. A total of 4000 bales of cotton was destroyed. Anderson, Calton and Company were the heaviest losers. Members of the firm said they lost \$204,000 in burned cotton. F. W. Herman and Company lost \$200,000 in the destruction of their warehouse stocked with hardware. The railroad's loss was \$100,000, including sheds and equipment.

Residents of the North Side were thrown into a panic when the flames jumped across Main street and set fire to a number of residences. The flames were brought under control after two hours with an estimated total loss of \$500,000.

The cause of the fire is unknown.

FOREIGN CORRESPONDENCE  
LONDON, March 26.—The governments of the Balkan states are in a somewhat transitory position, with seats of government in their own territory, but with the exception of the Serbians, who have established a permanent government in Belgrade, the others are in a state of flux. The Montenegrins have moved to Cetinje, the Albanians to Durazzo, and the Bulgarians to Sofia. The Serbians have established a permanent government in Belgrade, but the Montenegrins have moved to Cetinje, the Albanians to Durazzo, and the Bulgarians to Sofia. # Villistas Are Gathering Much Strength, Attack on Torreon is Threatened

## CORRESPONDENTS WORRY THE WAR DEPARTMENT.

Continual Wail is Heard at Misdoings of the Newspaper Men.

Stealth by Which They Evoke Army Rules and Send Out Unvised Stories from Mexico Raises Problem that as Yet is Unsolved—General Staff is Now Studying Methods of the German Foreign Office.

BY HARRY CARR.  
(SPECIAL CORRESPONDENCE.)

WASHINGTON BUREAU OF THE TIMES, March 25.—It isn't the activity of Senor Villa that causes the people up at the War Department to be awake at night. What the War Department is concerned about is the newspaper correspondents who are trailing along with the army. A continual wail is heard over their misdoings. The officers say that they get the censorship glued down tight on one telegraph station; then the reporters sneak off by night and file their dispatches at some other telegraph station which knows no censorship.

This is a problem which our army has never been able to deal with successfully. In a dispatch the General Staff is making a study of the methods employed by the German army in relation to war correspondents. The truth is, however, that the German army was similarly puzzled at the outbreak of the war. They told us at the General Staff in Berlin that they had anticipated every possible condition and circumstance that might arise in time of war except one; the American reporter took them by surprise.

After the first gasp, they speedily built up an efficient system. I can best describe it by stating my personal experience.

HOW GERMAN DID IT.  
I had been treated the same of the correspondents who understand to blow in, shake hands with the Kaiser and tell him they had come over to look at his war, had met with Villistas, Germans do not approve of informally. Being forewarned, I armed myself with letters of introduction from Count von Bernstorff and Capt. Von Papen.

With these I passed the border with ease. Once in Berlin, I called at the office of the German Staff and presented my letters. At the General Staff I was informed that nothing could be done for me unless I had a formal request from the German Staff. I was informed that nothing could be done for me unless I had a formal request from the German Staff.

For a long time that seemed as far as I could get toward the war. As I afterward realized I was undergoing a sleep-up process.

At the Foreign Office they furnished me with a programme covering two weeks' travel; suggestions of interesting things to see.

They started me out on a visit to a friend's home, where I couldn't possibly see anything that could harm the German cause. I was a spy of spies. From that I went to a military hospital; then I went to a prison camp. On the visit to the hospital my German companion was an official of the Hamburg-American Line.

When I went to the first prison camp, I went with a German professor, who in the head of the American Institute in Berlin and is attached to the General Staff. It is his duty to clip from foreign papers all matters relating to the Kaiser and send it to him. At the camp I was given a German American doctor, who had some kind of connection with the Foreign Office.

When I went to the second prison camp, I must have passed muster all right, for soon afterward I was invited to go to the "front."

HAD TO SIGN UP.  
In our army the correspondents are required to give a bond for \$3000 and to put up a certified check for \$1000 to cover expenses. After that they seem to be allowed to run around loose.

No such latitude was allowed with the German army. The night before starting for the front we were directed to assemble at the General Staff building. Here we were required to sign a paper, in which we were to promise that we would not make any statement that might be prejudicial to the German cause. We were not allowed to leave the party even for two minutes. On two stated occasions, we were given a morning off. The rest of the time we were marched around exactly like girls at a boarding school.

There were two officers in charge of the party. One was a captain of artillery who had been wounded and was waiting for an operation before going back to his battery. The other

## CALLES PROVES HIS GOOD FAITH.

General Invites Americans to Inspect His Garrison.

No Evidence of Hostile Move Seen at Agua Prieta.

Yaquis Poison Water to Kill Carranza Soldiers.

DOUGLAS (Ariz.) March 25.—Deploring that the United States and those of Douglas in particular, that the de facto government of Sonora was acting in good faith, Gen. P. Elias Calles, military Governor of the State, invited Sheriff Harry C. Wheeler of Cochise county, Arizona, to visit Cebolla and other points in North-eastern Sonora, where Carranza troops are located.

"If the Sheriff or a committee of citizens will inspect our camps for the purpose of ascertaining whether we are making no plans that could be construed as hostile," the Governor stated today.

Sheriff Wheeler visited Gen. Calles at the latter's headquarters at Agua Prieta, the Mexican town opposite here, to discuss reports of alarming nature that had been circulated by persons in Douglas, Arizona, to the effect that Gen. Calles was doing everything in his power to ally Carranza with the United States.

Wheeler stated that he was convinced that Gen. Calles was doing everything in his power to ally Carranza with the United States.

## DETERMINE FOR YOURSELF.

The Business-getting Value of the Various Newspapers which Solicit Your Advertising Patronage.

Every dollar spent for advertising should yield a reasonable profit on the investment.

Times "Liners" serve this purpose more effectively than any other agency. This is conclusively demonstrated by the fact that the Times regularly prints almost twice as many "Liner" advertisements as any other local newspaper.

The vast number of "Liner" advertisements regularly printed in the Times not only indicates thorough distribution of this newspaper in the homes of Los Angeles, but is conclusive evidence of the profitability of its advertising columns to those who use them.

Don't blindly accept verbal or printed statements relative to the effectiveness of newspaper advertising, but try out the various local papers, and so surely as night follows day, you will then concentrate your advertising in THE TIMES.

## Today begins Dress Up Week in Los Angeles.

Week! Radiate! Get into new togs! Be loyal to your city, your family and yourself by appearing in a new outfit of wearing apparel.

## SANTA FE REVENUE STEADILY INCREASING.

CHICAGO, March 26.—The Atchafalaya and Santa Fe railway system announced yesterday that its gross operating revenues for February 1916, were \$1,004,450, an increase of \$1,004,450 over the same month last year. Operating expenses increased \$1,004,450, and operating income increased \$1,004,450.

Gross operating revenues for eight months of the fiscal year totaled \$1,004,450, an increase of \$1,004,450 over the same period last year. Operating expenses were \$1,004,450, and operating income was \$1,004,450.

The net operating revenue for February was \$3,977,178, an increase of \$3,977,178 over February, 1915, and for eight months of the fiscal year, \$3,977,178, an increase of \$3,977,178 over the same period last year.

It is of interest that Great Britain is co-operating with the United States in the campaign against the German submarine in the Atlantic.

Information received at the State Department is that the British Government is doing all it can not only to protect American life and property but to make Carranza understand that it is in his interest to avoid a general war with the United States.

## The Times Free Information Bureau

### 619 South Spring Street

THE TIMES FREE INFORMATION BUREAU is for the accommodation and benefit of persons seeking interesting news of travel, desirable hotels and resorts, recreation and recuperation at the seashore or in the mountains. Particulars are furnished by competent attendants and by correspondence to the general public regarding rates and attractions of railroad and steamship lines, hotels and pleasure resorts. Photographs, descriptive literature and transportation literature are kept on hand for inspection and distribution. These services are rendered here in a few minutes without the delay incident to writing for it. All the information necessary for a safe and enjoyable journey or vacation. This service is absolutely free. LITERATURE also may be obtained at the New Times Building, Broadway and First streets. PERSONS CONTEMPLATING VISITING LOS ANGELES ARE PRIVILEGED TO HAVE THEIR MAIL ADDRESSED TO THE BUREAU.

### Resorts

The Ideal Summer Resort, Midway Between Los Angeles and Santa Monica Beach. Golf—Tennis—Bowling—Surf Bathing—Music Daily—Dances Weekly—Horseback Riding over Beautiful Mountain Trails. Poles for the children. Home 60304. STANLEY S. ANDERSON, Manager. Hollywood 4.

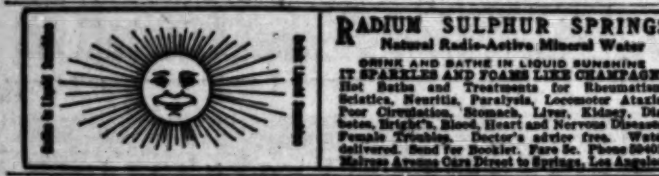

## ARLINGTON HOTEL

### SANTA BARBARA

An absolutely fireproof hotel—All Outside Rooms, affording plenty of light and air—Headquarters for tourists from all parts of the world. Private Lavatories in connection with all rooms. Ideal climate the year round. Automobile road is now perfect. 3 1/2 hours' run Los Angeles to Santa Barbara. Unexcelled facilities for care of automobiles in hotel grounds.

E. P. DUNN, Lessee.

The Only Large Resort Hotel in Santa Barbara Having Golf Grounds.

Hotel Green, PASADENA, European Plan Building. Offers to the transient guest and the motorist the only European Plan Service in Pasadena. American Plan Building. The Center of Social Activities. FOLDER on request. BRADLEY F. CURRING, General Manager.

Hotel Virginia, LONG BEACH. Absolutely fireproof. American plan. Golf, Tennis, Bathing, and many other diversions. Center of social events. Luxurious accommodations. Hospitable atmosphere. Spend the week-end. Write for folder. W. E. Neale, Mgr.

Mt. Wilson Hotel and Bungalows. Finest auto road in Southern California. Daily stage from Los Angeles and Pasadena. Road open to private machines. For rent take the Sun. Wilson station. Dining-room American plan. Try our ranch fresh chicken dinner. Sunday breakfast. Information phone W. E. COY, Manager. Fair Oaks 54-P-2, or Pock-Judah Co., Los Angeles, Main 1792.

Alpine Tavern on World-Mt. Lowe. DELIGHTFUL PLACE ON THE FAMOUS MOUNTAIN. EXCURSION FARE TICKET FROM AGENTS, Los Angeles—Daily Nov.—\$1.00.

SANTA CATALINA ISLAND. WILMINGTON TRANSPORTATION COMPANY'S (Steamship Line) Steamer "HERMOSA" (141 passengers) makes daily trips. For all reliable information call on BANNING COMPANY, Agents, 154 (Main Entrance) Pacific Electric Building, Sixth and Main. Los Angeles, Cal. Phone: Main 14-1664.

Los Angeles Hotels and Apartments. HOTEL ALVARADO. American Plan. Sixth and Alvarado Streets. High-class residence district. Less than ten minutes' shopping center. First-class hotel service at a very moderate rate. Couples or families, be assured of being taken care of at a very satisfactory rate.

Superb Routes of Travel. BEST ROUTE FOR ALL POINTS EAST. Tour Gladys National Park this Summer. S.E. "Great Northern" and "Northern Pacific" San Francisco to Portland. J. W. Platon, Jr., P. O. Box 1461, 606 South Spring Street. Telephone: Broadway 1314; Home 7134.

City Restaurants and Cafeterias. A Regular Bdw. Show. Cafe Bristol.

Steamship Beaver. \$8.35 1st Class. \$5.35 2nd Class. Sails Saturday, April 1. All fares include Berth and Meals. San Francisco, Astoria, Portland.

AND ALL POINTS EAST. Sailing Apr. 1, 15, 18, 22. C. O. KRUEGER, Dist. Pass. Agt. 517 S. Spring St. Home A3761; Main 1594.

City Restaurants. FASHION FANTASY of latest skating togs. BRISTOL ICE PALACE as a part of this DRESS-UP WEEK.

Special Oriental Service. SS "FLORIAN" sails from San Francisco April 15th for Yokohama, Kobe, Shanghai and Hongkong. FREIGHT ONLY. For Rates and Space apply to AMERICAN HAWAIIAN STEAMSHIP CO., 200 Broadway National Bank Bldg., Phone: Home 9057; Main 5441.

It Cures Through the Pores. Know-Doc Pore Treatment for Rheumatism, Neuralgia, Headache, Backache—any pain of skin.

## WILSON IS GATHERING ALL EVIDENCE ON SUSSEX.

President Determined to Secure Proof Positive as to the Origin of Disaster to Channel Steamer Before Taking Any Action Against Germany—Administration not Yet Satisfied that Torpedo was Responsible.

[BY A. P. NIGHT WIRE.]

WASHINGTON, March 26.—Official information, upon which President Wilson will decide whether the sinking of the steamship Englishman and the damaging by an explosion of the channel steamer Sussex, were the result of acts of violation of international law, is being gathered from every available source by consular representatives of the United States in England and France. Tangible evidence of some kind to-night momentarily was expected by the State Department.

Dispatches already received indicate that several Americans were injured or killed on the Sussex in the disaster. Four American citizens, who were aboard the Englishman and who were said in dispatches yesterday not to be among the rescued, still are unaccounted for.

Only one dispatch of importance concerning the explosion, which damaged the Sussex, was received by the State Department during the day. This contained an affidavit made in London at the residence of the British ambassador, Sir George Buchanan, by two American survivors, Edward S. Huxley and Francis E. Drake of New York. Both swore that the explosion occurred "without evidence, or even a suggestion, that either of the ships was armed, so no defense could be offered on that score."

Another statement in the affidavits, officials seemed to consider significant, had to do with a strange sailing vessel, which hovered near the Sussex after the explosion and which in response to signals for assistance from the channel steamer, sailed away and disappeared. Press dispatches quoting a Belgian army officer as saying the submarine probably had hidden behind the strange vessel, which apparently disregarded all the traditions and laws of the sea in failing to succor a vessel in distress, were read with interest.

Prof. J. Mark Baldwin and his wife and daughter, reported in press dispatches as being aboard the ship, were declared to be safe, in a cablegram dated today in Boulogne, received here tonight from Prof. Baldwin. J. J. Stewart, a son-in-law.

It is estimated variously at fifty or eighty. The majority of the survivors of the Sussex, who have reached France, assert the vessel was torpedoed and there is no question of any warning having been given. None of them saw a mine or indication of one, whereas, the greater part of those whose stories have been given assert that they saw the wake of a torpedo.

The Belgian army officer who was on the Sussex states that the reason a periscope was not observed is that near the Sussex was a merchantman, which bore on its hull the name Nieuport XIX. He states that this vessel approached the Sussex and screened the submarine as soon as the explosion occurred. According to this account the Nieuport XIX, a Belgian steamer, passed by the Sussex, sailed away without landing aid. The total number of victims is still unknown.

Official Communiques FROM THE GREAT WAR. [BY ATLANTIC CABLE AND A. P.]

PARIS, March 26, 11:25 p.m.—The British official statement on the campaign in France and Belgium, issued tonight, reads: "The enemy exploded a mine yesterday near Giverny, but did little damage. 'Early yesterday morning the enemy sprang a mine near Neuville-St. Vaast and occupied the crater. Our counter-attack took the crater, but was driven back later by enemy bombers."

There was trench mortar and rifle and grenade activity at the Hohenzollern redoubt and quarries today. The enemy shelled Kruschatz, Hoek, Saint Jean, the neighborhood of the Loos-Lorette spur and Vaux. The enemy was blowing up an ammunition depot near Oost Taverne. "One of our aeroplanes which went out yesterday has been returned."

FROM PARIS. [BY ATLANTIC CABLE AND A. P.]

PARIS, March 26, 10:25 p.m.—The official communication issued tonight says: "In the Argonne we concentrated our fire on the lines of the communication behind the enemy's front. We bombarded revictually convoys north of Apremont. "The Meuse there was a violent bombardment between the village and wood of Malancourt and against our second-line positions. No infantry action occurred. "East of the Meuse and in the Woerthe the German organization was very active. Our artillery was very active in the region of Arrascourt, where the fire of our batteries caused several explosions and in the region of the Meuse, where we dispersed a large convoy. "West of Pont-a-Mousson the fire of our trench guns directed against the day, but she was unable to capture a large depot. Our long-range guns bombarded the railway station at Vigneulles-les-Hatton-Chatel. "This plant, however, is not a communication line in the Valley of the Fecht. "This morning a German aeroplane was brought down; it fell toward our lines in the neighborhood of Douaumont. "The Belgian official communication reads: "Artillery action on both sides occurred on the Yser front."

Get Up Right. (Leslie's.) Get up right in the morning. Go to bed right at night. Start with joy in your heart, hope in the future, kindness in your purpose. If it is a dark day, never mind; you will lighten it up. If it is a bright day, you will add to the brightness. Give a word of cheer, a kindly greeting and a warm handshake to your friends. If your enemies look up, pass them by, forget and try to forgive. If all of us would bear in mind that the battle is not won within and not from without there would be a well-spring of joy in every heart and the sun would shine forever. Try it!

The Intelligent Youth. [Puck.] The boy was very small and the load he was pushing in the wheelbarrow was very, very big. A benevolent old gentleman, putting down his burden, lent him a helping hand. "Really, my boy," he puffed, "I don't see how you can manage to get the barrow up the gutters alone." "I don't," replied the appreciative kid. "Dere's always some jay a' standin' round as takes it up for me."

### OUR NATIONAL DEFENSE.

Our Isolation Makes a Large Navy More Important than a Large Military Force.

[New York Commercial.] It was to be expected that our War College authorities would come forward with a strong plea for a big army. The minimum they recommend is half a million regular soldiers to pass as a mobile army to meet the foe at his landing point, half a million more in reserve available within ninety days and arrangements for the raising of another half million as soon as war breaks out to replace the wastage. This and other recommendations are based on the statement that Germany and Austria-Hungary, for example, are sufficiently supplied with transports to land on our shores in six weeks two expeditions totaling 1,000,000 officers and men, provided the United States Navy was unable to intercept their transports. Japan alone could land 225,367 thoroughly equipped troops on the Pacific Coast in two months according to these authorities.

We need not shiver. "We require better defenses than we have, but the War College has not proved its case for a big army. It has shown its own showing that we need a navy for coast defense with plenty of submarines and scout boats and aeroplanes. The British islands did not contain 200,000 regular soldiers when the war broke out and they sent more than half of them to France, but the country was safe behind a few miles of water that one can see across on a clear day because its navy was there to guard its shores."

Germany intended to invade England, the only intelligent writer of a large concept of war, Kipling said, is full of light draft boats, most of them built of aluminum, designed especially for a quick descent on the English coast. These boats can go very deep enough to set off mines. Mines must be sunk low enough not to be easily observable. This plan was thoroughly worked out and the boats were built but the British navy did not let them approach the coast. The British government plunged into this war unprepared for land operations but with a navy trained to the minute and thoroughly mobilized. A military expedition could not leave Europe in secret and we would have time to mobilize our coast defense fleet before a foe could reach our shores."

It taxed the resources of the British empire to land a large army in South Africa during the Boer War. It taxed our resources to land a small army in Cuba. It is taxing the resources of the allies to land 3000 or 4000 men a day at Saloniki. The Teutonic powers would need at least 3000 vessels to land a million men with artillery, horses, stores and war materials on our shores in six weeks and it would be impossible for them to do it if they did not capture one or more large and well equipped sea ports. If an enemy landed an army at a remote point in Western Washington, which is cut off from the rest of the United States by natural obstacles, the invaders could not get inland because they could be blocked at the very points which the War College says they could hold. If the Turks can drive a British army back from Bagdad surely we could resist invasion on our much more difficult coast.

TELL TIME BY FLOWERS.

Petals Have Regular Hours for Opening and Closing and One Can Order His Work by Them. [New York Times.] Anybody who has flowers enough and a sufficient knowledge of them need never be at a loss to ascertain approximately the correct time, for there are any number of blossoms that open and shut at regular hours. A practical botanist has made a list of a few of them and says that a far better clock can be had by observing the flowers than by looking at a clock face.

The common dandelion orders its daily life systematically. It opens its leaves at 5:30 a.m. and closes at 8:30 p.m., being a model of deportment, indeed. To be sure, there are other plants that get up earlier, but they observe shorter hours. In the temperate regions, the plant that wakes up first is the daisy, which opens its petals at 6 a.m. and closes at 8 a.m. The tulip, which opens its petals at 7 a.m. and closes at 9 a.m., is a model of regularity. The poppy, which opens its petals at 8 a.m. and closes at 10 a.m., is a model of regularity. The carnation, which opens its petals at 9 a.m. and closes at 11 a.m., is a model of regularity. The pansy, which opens its petals at 10 a.m. and closes at 12 p.m., is a model of regularity. The violet, which opens its petals at 11 a.m. and closes at 1 p.m., is a model of regularity. The hyacinth, which opens its petals at 12 p.m. and closes at 2 p.m., is a model of regularity. The rose, which opens its petals at 1 p.m. and closes at 3 p.m., is a model of regularity. The lily, which opens its petals at 2 p.m. and closes at 4 p.m., is a model of regularity. The iris, which opens its petals at 3 p.m. and closes at 5 p.m., is a model of regularity. The peony, which opens its petals at 4 p.m. and closes at 6 p.m., is a model of regularity. The geranium, which opens its petals at 5 p.m. and closes at 7 p.m., is a model of regularity. The fuchsia, which opens its petals at 6 p.m. and closes at 8 p.m., is a model of regularity. The verbena, which opens its petals at 7 p.m. and closes at 9 p.m., is a model of regularity. The morning glory, which opens its petals at 8 p.m. and closes at 10 p.m., is a model of regularity. The nasturtium, which opens its petals at 9 p.m. and closes at 11 p.m., is a model of regularity. The primrose, which opens its petals at 10 p.m. and closes at 12 p.m., is a model of regularity. The pansy, which opens its petals at 11 p.m. and closes at 1 p.m., is a model of regularity. The violet, which opens its petals at 12 p.m. and closes at 2 p.m., is a model of regularity. The hyacinth, which opens its petals at 1 p.m. and closes at 3 p.m., is a model of regularity. The rose, which opens its petals at 2 p.m. and closes at 4 p.m., is a model of regularity. The lily, which opens its petals at 3 p.m. and closes at 5 p.m., is a model of regularity. The iris, which opens its petals at 4 p.m. and closes at 6 p.m., is a model of regularity. The peony, which opens its petals at 5 p.m. and closes at 7 p.m., is a model of regularity. The geranium, which opens its petals at 6 p.m. and closes at 8 p.m., is a model of regularity. The fuchsia, which opens its petals at 7 p.m. and closes at 9 p.m., is a model of regularity. The verbena, which opens its petals at 8 p.m. and closes at 10 p.m., is a model of regularity. The morning glory, which opens its petals at 9 p.m. and closes at 11 p.m., is a model of regularity. The nasturtium, which opens its petals at 10 p.m. and closes at 12 p.m., is a model of regularity. The pansy, which opens its petals at 11 p.m. and closes at 1 p.m., is a model of regularity. The violet, which opens its petals at 12 p.m. and closes at 2 p.m., is a model of regularity. The hyacinth, which opens its petals at 1 p.m. and closes at 3 p.m., is a model of regularity. The rose, which opens its petals at 2 p.m. and closes at 4 p.m., is a model of regularity. The lily, which opens its petals at 3 p.m. and closes at 5 p.m., is a model of regularity. The iris, which opens its petals at 4 p.m. and closes at 6 p.m., is a model of regularity. The peony, which opens its petals at 5 p.m. and closes at 7 p.m., is a model of regularity. The geranium, which opens its petals at 6 p.m. and closes at 8 p.m., is a model of regularity. The fuchsia, which opens its petals at 7 p.m. and closes at 9 p.m., is a model of regularity. The verbena, which opens its petals at 8 p.m. and closes at 10 p.m., is a model of regularity. The morning glory, which opens its petals at 9 p.m. and closes at 11 p.m., is a model of regularity. The nasturtium, which opens its petals at 10 p.m. and closes at 12 p.m., is a model of regularity. The pansy, which opens its petals at 11 p.m. and closes at 1 p.m., is a model of regularity. The violet, which opens its petals at 12 p.m. and closes at 2 p.m., is a model of regularity. The hyacinth, which opens its petals at 1 p.m. and closes at 3 p.m., is a model of regularity. The rose, which opens its petals at 2 p.m. and closes at 4 p.m., is a model of regularity. The lily, which opens its petals at 3 p.m. and closes at 5 p.m., is a model of regularity. The iris, which opens its petals at 4 p.m. and closes at 6 p.m., is a model of regularity. The peony, which opens its petals at 5 p.m. and closes at 7 p.m., is a model of regularity. Off to school, full of Vim and "Pep"

Don't cram their little "tummies" with greasy meats, starchy potatoes or other indigestible foods. One or two Shredded Wheat Biscuits with hot milk make a warm, nourishing meal that supplies all the material needed for their growing bodies. The perfect food to study on, to grow on, to play on. The crispness of the shreds encourages thorough chewing, which develops sound teeth and healthy gums. Being ready-cooked it is so easy to prepare a warm, nourishing meal with Shredded Wheat in a few moments—no kitchen worry or work.

MADE AT NIAGARA FALLS, N. Y.

men an urgent request not to ship white pine, currants and gooseberries

The Federal authorities have taken this means of assuring the protection of the white pine forests without the imposition of a plant quarantine. The spread of the rust would endanger the territory mentioned government and private holdings with a value of \$148,966,000. It is estimated. The rust has gained a foothold in six Eastern States and is suspected in the Ohio Valley. The States are included in the range where it could carry the disease as well as the white pine itself.

**PANAMA CANAL'S STATUS**

Geologists Say there's no Reason to  
Fear its Permanence Though the  
Islethm is Gradually Rising  
at the Rate of Three Feet  
in a Hundred Years.

[Topeka State Journal:] That the Panama Canal will not be swallowed up by an earthquake in the future and that the troublesome slides now being encountered will eventually be conquered and the great waterway made an "unqualified success" is the opinion of Topeka geologists.

marly canal geologist and now mining geologist for the United States Bureau of Mines. Mr. MacDonald, who has made several very successful expeditions to the making of the canal, is very ready as to the value of the earth's crust, has just made an official report to the effect that, while through volcanic disturbances the water level of the canal has risen and fallen three feet every hundred years, this will not necessarily injure the canal. As far as he sees, it will merely mean a readjustment of the water level, a dredging of the big waterway. The cause of this rising, he says, is the sinking of the ocean bottom outside the canal. He says that at the same time there is a little movement of the ocean bottom, the lithman, to be in harmony, joins in. He also suggests that if the rising motion he rapid, there would be a little disturbance of the canal, but that from what he

happened in recent geologic time can be concluded that the canal is not a natural feature of the terrain. The instability of the left-hand land. The rising of the Isthmus, however, is being responsible for the many slides that have been encountered. The movement of the ground has dislocated and crushed the rocks, leaving them weak and unstable. "At various times," says Mr. O'Leary, "the faulting of the Isthmus, Cuba, has concerned these faults have increased the cost of the canal several million dollars. As to the slides, Cuba has many varieties of rock in the vicinity of its length. Some of these are weak and unstable, and where the ground is very high, the slides go to 200 feet high. The weaker rocks crushed down to flatter slopes. Wherever the slope got flat enough, the

engineering staff constructing the canal believe that the slides were a menace to the ultimate completion and successful operation of the canal. The slides, however, sometimes they were somewhat troublesome. They have made necessary the excavation of about 10,000,000 mc of material and the construction of the first estimates for Culcra, but they have not in the past and will not in the future endanger the ultimate completion of the canal. Donald calls attention to the fact that one is apt to forget that the greatest variation of atmospheric pressure occurs at sea level may be more than four inches of water. He says that if the adjustment of atmospheric pressure in a very large cave or mine lags behind any quick increase in atmospheric pressure, a considerable strain may be added

the roof of such an excavation. Discussing the real cause of the slides, Mr. MacDonald says that it is the unevenness of the immediate cause was the oversteepness and height of the slopes, the blasting and other work attributable only to man. He says that the geological conditions were not sufficient to be considered in the first plans for digging Culebra Cut. As the strength of the famous Gatun Dam had been proved by the question of its stability on occasions, Mr. MacDonald refers to it in some length. "It was found that the same length the Gatun locks are relatively safe and sound, and that the foundations for heavy structures. However, some writers, even recently, have affirmed that the Gatun locks would sink into mud beneath the natural slides and that the locks and dam would sink their foundations and be damaged or destroyed. Opinions

Why Oriental Art is Esquisite.  
[New Republic] The difference in character between English and oriental art is not only a matter of taste, but of natural environment. The empty spaces with which a delicate art likes to surround itself are supplied for the Englishman by his "steppe country," for the Chinese by his "empty mountains." The Chinese artist is not a "landscape painter," as the Englishman is, but a "landscape poet."

the reticence of his imagination. The unexpressed dimension, the background of pregnant silence, exerts its influence in all his poems. For the Baroque, on the contrary, nature is an abyss; parched deserta, bare mountains, silent night with its overwhelming darkness, the human condition altogether transposed: nature is cruel, alien, excessive, to be fled from with a veiled face. For a relief and solace he builds his houses without windows—he makes his life simple, his religion a single phrase, his art exquisite and slight, like the jet of his fountain. It is sweet and without strain to him to say that we should respect the human scale when everything in nature so infinitely transcends it.

**Cause of Sick Rhetorics.**

Today begins Dress Up Week in Los Angeles. Spruce up! Radiate! Get into new togs! Be loyal to your city, your family and yourself by appearing in a new outfit of wearing apparel.

THE CITY  
AND ENVIRONS.

## EVENTS BRIEFLY TOLD.

## Continued Series.

The last lecture of the series by the Southern California Association of Applied Psychology on the diagnosis, care and education of exceptional children will be given this afternoon at 4 o'clock at No. 663 Wilmer street. All specially interested are invited to attend.

## A Guest Exhibit.

A noteworthy feature of dress-up week is to be a display of the latest in the season's style by the Merchant Tailors' Exchange at the Clark Thursday afternoon and evening. It will be the place for the man in doubt to settle the question of what is correct in the way of business, semi-dress, sporting and evening attire. Slightly improved.

Col. Henry Lamb, who has been seriously ill at his home, No. 3005 Orange street, suffering from an acute attack of bronchitis was some improved last night, according to his physician. He is in a weakened condition, but the paroxysms that marked the first few days of his sickness are less frequent. He has been hemorrhaging almost continuously for nine days.

Not a person on the programme for the meeting of the Advertising Club at the Clark tomorrow will be over 21 years of age, according to W. T. Specht, who is chairman of the day. Among those who will speak are Graham Tansley and William Bradley, students of Journalism at the University of Southern California; Leo Daumack, a pupil of the Polytechnic High School; and Herbert Hill.

## AMERICA LEADS.

Holds Large Preponderance as Producer of Crude Oil.

Robert Stewart, a director of the Standard Oil Company of Indiana, when under examination by the Fire Committee Council of Minneapolis recently, said that the advance in the price of gasoline was due to the increased cost of crude oil. Asked as to what would help the price situation, he said an embargo on gasoline shipments to the war zone might do so. In this connection it is interesting to note that a preponderance of the United States holds as an oil producer. The following are the government figures on world's output for 1915:

Country	Barrels	Per cent of world's output
United States	241,000,000	52.12
Russia	100,000,000	21.72
Canada	25,000,000	5.41
France	12,000,000	2.64
Other countries	102,000,000	22.11

Germany is well down in the list of the other countries, being credited with a production of 1,000,000 barrels, or 0.27 of the world's output.

## WHERE POSTAGE GOES.

The Two Cents is Split up Into Fractions for Expenses.

[Philadelphia Public Ledger.] Maybe you are interested in knowing how Uncle Sam spends the 2 cents you paid him to carry that letter for you.

The big slices out of these two pennies are these: A sixth must be set aside for rural delivery, nearly a half of them, or almost one whole cent, goes to pay for office clerks, a tenth is paid to railway mail clerks and a sixth to the railroad which actually carried the letter. There are a few other small slices.

As a matter of actuality, Uncle Sam wouldn't make both ends meet in carrying the mails last year—they didn't meet by \$11,000,000. It is amazing how fast some of the expenses of the postal department grow.

In fifteen years the rural delivery expenses have grown almost 12,000 per cent. Railway postal clerk wages have grown 221 per cent. Services in the post offices have increased 173 per cent.

The railroads have not done well in carrying mails. They are now getting only 50 per cent. more than they received fifteen years ago, although postal revenues has advanced 187 per cent.

Or, put it this way: All other post-office expenses in fifteen years increased 239 per cent., while the railway pay for hauling it increased but 66 per cent.

Moral: People who own railroads have no rights which a Postmaster-General is bound to respect.

Washington's Address. [San Francisco Star:] Miss Wheat, the new teacher, was hearing the history lesson. Turning to one of the scholars, she said: "What was Washington's farewell address?"

The new boy arose with promptitude that promised well for his answer. "Heaven, m'am," he said.

—and the Worst is Yet to Come.

## PERSONALS.

Koji Yamada, champion Japanese billiard player, is at the Angeles, registering from New York City.

Melvin Schuster, of New York City, was among the arrivals at the Alexandria yesterday.

Simon Levi, a leading wholesale commission and produce merchant of San Diego, registered at the Stowell yesterday.

F. B. Chapin, capitalist of Toronto, Can., who has large interests in California oil fields, is at the Van Nuys, where he arrived yesterday.

Paul Gore, manager of the Annex at Chicago and one of the best-known hotel men of the Middle West, arrived yesterday and is stopping at the Van Nuys.

M. C. Isaac, former head of a large brush manufacturing company of Chicago, but now retired, who is touring the West, arrived here yesterday and is at the Angeles.

W. B. Kellogg, manager of Hotel Sutter, San Francisco, is a guest at the Lankershim, where he arrived yesterday.

Mrs. Elizabeth Busch, wife of the proprietor of a coke works and iron foundry, Birmingham, Ala., is at the Lankershim Hotel, where she arrived yesterday.

## MANY NEW WELLS.

Largest Number Yet Reported from Oil Fields in One Week.

The largest number of new wells yet reported in a single week is shown in the State Mining Bureau report for the week ending March 15, 1916. Twenty wells are reported as commencing work, twelve of them in the Los Hills, the others at Coalburg, Midway, Kern River and near Coyote. Thirteen wells were reported for deepening or reworking, and twenty-two tests of water shut-off, both of which are well above the average. One well is reported for abandonment.

## SHIPMENT FIGURES.

Movement of California Food Products by Rail Last Month.

February shipments of California dried and canned foods by rail were as follows:

Commodity	Value
Canned fruits and vegetables	\$1,250,000
Almonds	1,000,000
Apples	1,000,000
Prunes	1,000,000
Other dried fruits	1,000,000
Other canned foods	1,000,000

"A Scrap of Paper," Odd Phrase—[Dundee Advertiser:] According to Le Figaro, the famous expression, "A scrap of paper," was used as long ago as the eighteenth century by Lord Chesterfield, and, strangely enough, to brand the conduct of an ancestor of William Pitt—the great Frederick himself.

The latter, betraying the French alliance to negotiate in an underhand way with England, had ordered his minister, Pederle, to explain to Lord Chesterfield that the invasion of Bohemia had not been a real act of aggression, but a precaution of legitimate defense taken against the threats and snares of Austrian politicians.

"I very much doubt," reported Lord Chesterfield, "if these fears, whether they be well or ill founded, are sufficient grounds for taking up arms against a neighbor. The most solemn treaties are only scraps of paper if the powers that be have sufficient reasons to authorize their being broken." This conversation is related by Chesterfield himself in a letter dated February 21, 1745.

A Disappointed Mother. [Indianapolis News:] When John Rice of St. Paul, Minn., found himself in the British army at the opening of the Boer War he wrote to his parents asking for money with which to buy himself out. This was forthcoming, and his mother prepared a delicious plum pudding against the day of John's expected homecoming. That was sixteen years ago, and the parents have never since heard so much as a word from the boy. The story came out recently when the mother, injured in an accident and confined in a St. Paul hospital, expressed the wish that in case of her death the pudding might be placed in the grave with her body.

Business Brevities. [Advertising.]

ITCHING BLISTERS  
ON BOY'S HEAD

Got Worse. Affected Ears, Neck  
and Face. Scratched Day and  
Night. Terribly Disfigured.

HEALED BY CUTICURA  
SOAP AND OINTMENT

"When four months old my boy suffered with blisters and a spot of eczema on his head. I got some Cuticura and he did not seem to improve but got worse and his ears, neck, and face were affected. He scratched day and night the itching was so intense, and we had to keep his hands pinned the whole time. The skin was sore and he fussed, and he didn't have a hair on his head. It was just a case of severe eruptions, and his face was terribly disfigured."

"He got so bad we had to keep a mask on his face. The trouble lasted for months when a lady told my husband about Cuticura Soap and Ointment, and we got them. The third day I noticed a big improvement and in two weeks my boy was healed." (Signed) Mrs. H. A. Thiele, 348 1/2 St. Milwaukee, Wis., Oct. 25, 1914.

## WIRE-BOMB SET BY FAIR HAND?

Explosives Found in Flaming  
House; Woman Jailed.

Loaded Hat Boxes are  
Linked by Powder Fuse.

Washed Rags are Feature of  
Still Another Fire.

Three hat boxes loaded with benzene and connected with a loose cotton band sprinkled with black gunpowder, found in a fire-swept house at No. 148 1-2 Cleveland street early yesterday, led to the arrest of Mrs. Theresa Marra, a comely Italian woman. She is suspected of having knowledge of the arrangement of the boxes, which the police describe as a most ingenious and effective wire-bomb.

Mrs. Marra is 38 years old, the wife of a 4-year-old boy. She lives at her husband's, P. A. Marra, in the half of the double house owned by Mrs. Natalie Falcone.

At 10:30 p.m. yesterday, March 26, the fire broke out in the rear of the house, which is at No. 148 1-2 Cleveland street, said they saw Mrs. Marra enter the house a short time before the fire with a bottle in her hand. Then she hurriedly left, they said to the police, and less than ten minutes later the fire was discovered.

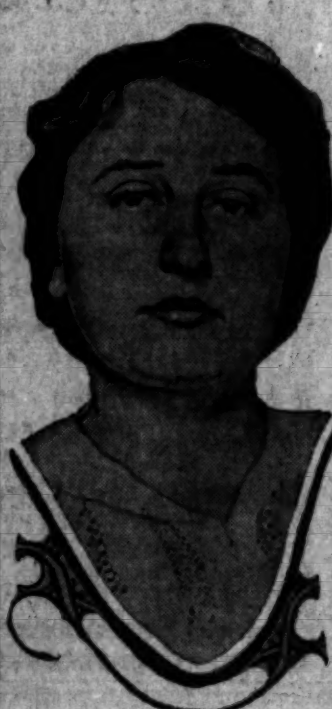

Mrs. Marra was alone in the house at the time. She was seen by the firemen as she came upon the stairs, and she was seen by the firemen as she came upon the stairs, and she was seen by the firemen as she came upon the stairs.

Within each was a mass of the fine crush paper which hats are packed. And each was thoroughly saturated with benzene, the police report. There was a hat box, so charged, in each of three rooms, all connected with a single inflammable fuse of cotton soaked with powder.

The fire failed to destroy the house beyond the conception of those who investigated and the firemen discovered the boxes with the fuse as evidence.

They arrested Mrs. Marra, secured the boxes with the fuse as evidence. Mrs. Marra protests she was playing with powder.

of an arson plot.

## SHOCK BRINGS DEATH.

Laborer Succumbs After Legs are Cut  
Off by Car.

Raimon Aberis, 18 years old, a laborer who lived in Hollywood at an unknown address, died in the St. Francis Hospital yesterday from the shock when his legs were amputated by a Pacific Electric train at Sunset boulevard and Figueroa street Saturday night.

Motorist J. W. Fitzpatrick, in charge of the car, said he did not see Mr. Aberis until too late. There were no other witnesses.

Mr. Aberis was unconscious when taken to the hospital. The body was taken to the Pierce morgue. Coroner Hartwell will hold an inquest.

## WILD-FLOWER EXHIBIT.

The children's department of the Public Library will conduct a wild flower exhibit on the seventh floor of the Metropolitan Building this week.

Dr. Anstruther Davidson will classify the flowers and will be assisted in this work by Dr. Hector Allist, curator of the Southwest Museum, who will present to the members of the section, and promised to personally assist them in learning the kind of aeronautics that will be of benefit to the army or navy should this country ever be at war.

The militiamen will benefit by the experience of experts who are attending the Martin Aviation School and will be instructed every Sunday by Corp. Al Smith of the Signal Corps, United States army.

Ensign Simpson is enthusiastic over the possibilities of the aeronautic section. He says there is reason to believe it will grow into a division, which will be equipped with two more aeroplanes. A number of additional men are needed to form a division, and the opportunity is at hand for enlistments.

MUST BE SOLDIERS.  
Because it is generally conceded that an army aviator, who has not had military training is almost worthless to the service, Ensign Simpson says great care will be taken to have the men under his command well schooled in military tactics. In fact, more time will be devoted to teaching them military maneuvers than to flying or operating an aeroplane.

Every Thursday evening Ensign Simpson will drill the naval militia headquarters and he will accompany them each Sunday to the aviation field. Four of his men, Messrs. Musick, Calloway, Burns and Stroud, have received pilot licenses, and are capable of taking an aeroplane voyage. It is more than likely that one or more of them will be given an opportunity to do so next Sunday.

The aeroplanes presented to the

Swell Aviation Corps.

A fully-equipped, \$7500 Martin biplane was formally presented to the aeronautic section of the Second Battalion, California Naval Militia, yesterday, by Glenn L. Martin, famous aviator and manufacturer of war and commercial aeroplanes. The event, which was staged at the aviation field in Griffith Park, was of considerable significance, marking the beginning of military training in the science of aeronautics for state soldiers on the Pacific Coast.

The biplane, known as the Martin pusher type, built exclusively for military service, was officially accepted by Ensign Frank Simpson, Jr., who is in command of the aeronautic section. The thirty-two enlisted men

## SHORT SKIRTS ARE COMING.

Also, Whoopie! the Hoop Skirt  
is Coming Back, Says Visiting  
Expert on Dress.

We are going to see more of women, according to L. Kastro, who is a modiste and is registered at the Alexandria Hotel New York, for skirts are going to be shorter. No, not so much shorter, according to Mr. Kastro, for well-ballet skirts are not to be expected for several seasons yet by our best-known prognosticators.

Also, according to Mr. Kastro, the "barrel" skirt will be shown shortly for the first time. This is a silhouette of the 1890 period, but greatly changed. There will also be a tendency on the part of real up-to-date dressers to add artificially to the width of the hips in a way best known to women.

Regarding the tendency to add to the width of the skirt at the hem, there is really nothing new to report, though the experts agree that as skirts are going to be shorter, there is no reason why the women should not use the goods in another way.

Also, according to Mr. Kastro, the "barrel" skirt will be shown shortly for the first time. This is a silhouette of the 1890 period, but greatly changed. There will also be a tendency on the part of real up-to-date dressers to add artificially to the width of the hips in a way best known to women.

## HELM DOWN ON TRAIL OF GOLD.

Los Angeles Ships Chartered  
for Pacific Service.

Barnacles Scraped from Many  
Keels as Rates Advance.

Fervent Demand for Vessels  
Due to European War.

Formal announcement by the American-Hawaiian Steamship Company yesterday that both the Floridian and Honolulu have been chartered for beyond-sea service capped the climax of a series of deep-sea happenings, which bid fair to make the high cost of charter rates assume a position in the landlubber's mind analogous to the high cost-of-living factor of some years back.

The charter rates for the Honolulu, a vessel of 4400 tons, for two round trips between Seattle and Vladivostok, is officially given out as \$160,000, while the rate for the Floridian is semi-officially understood to be about the same. Both vessels were, until recently, in the Los Angeles-New York service, via the Panama Canal. The Honolulu, it is understood, was in this port when drafted for trans-Pacific service. The Floridian while in Seattle-Vladivostok service is expected to earn her owner \$500,000, and to yield her charterer, H. P. Osterander of Seattle, a princely sum, as he has contracted to deliver large quantities of freight to the Russians.

But the chartering of these two ships are but items in a course of events that bid fair to carry seaward all the derelicts and tubs of a nation. Crafts which had been given over to mud and the "movies" and to barnacles and for use as bunkers are now reappearing on the trade lanes and old salts are reminded of the feverish days of the Klondike rush, when everything that moved on a keel was pressed into the Pacific coastwise service.

This intense demand for steamers and barks—where they can be found—is one of the big features of present-day history, consequent on the European war, and is leading to remarkable marine transactions, in which vessels familiar to Los Angeles Harbor are playing their part.

A REBIRTH.  
Most notable of locally-known vessels, which have been born again, as it were, is the once famous Aldora, which was towed to Long Beach

(Continued on Second Page.)

## HAS EPISTOLARY KICK.

Man with many Feminine Correspondents Objects to the Censor.  
Gets Letter from Russian Princesses Referenced to  
Weather Painted Out.

The European war is interfering seriously with the international correspondence of H. W. Osborn, a retired merchant and world traveler of Minneapolis, who is sojourning in Los Angeles. All of the letters which come from his women friends in various lands, show the obliterating marks of unsentimental censors.

The "last straw" is a defaced letter from the Princess Andronikoff of St. Petersburg, Russia, which was received by him yesterday at the Clark, where he is a guest. A reference to the weather in Russia was painted out.

"This seems to me to be the limit," Mr. Osborn declared. "What is one to do if he cannot speak or write of the weather? The censor who took that liberty with my letter certainly was overstepping his prerogatives and if I knew who it was I would write him to that effect."

For some time, all references to the war, movement of troops, the food supply, suffering of the soldiers or populace have been eliminated from my letters by the censor, but this is the first time that a reference to the weather has been blotted out."

Mr. Osborn corresponds with women in these countries besides Russia, Germany, England, France, Italy, Belgium, Japan, Australia, Spain and Portugal. He has an interesting collection of pictures of his women friends scattered over the globe. Practically every one of them is a "beauty." However, he declares that he writes love missives to none of them, sticking closely to the "friendship" type of communication.

"It will be greatly to the interest of my correspondence for the European war to stop," Mr. Osborn continued. "The war censors are trespassing on my personal rights and I'm tired of it."

Glad Rags.  
MR. MAN, DRESS UP!

Great Week of Sartorial Splendor is Here. With Natty Displays that Represent Sharp Rivalry in Downtown Show Windows: Theaters in Line.

Dress-up Week is here. The wondrous window displays of men's fashionable attire are open to public view, and wearables of every description for every possible occasion are shown in down-to-the-minute form.

Much competition developed among the window dressers of the many stores on the announcement of a prize for the best display. Behind locked doors and with much preparation the elaborate "props" were assembled in much secrecy, each desiring to surprise his rivals at this morning's unveiling.

At the leading theaters this has been announced as "Dress-up Night," the public being urged to attend in evening garb.

Sam Neat will appear on Broadway and Spring streets between 12 and 1 o'clock today. To the first two persons who identify him he will present merchandise orders on the Dress-Up Week committee. The proper salutation for Mr. Neat is, "You are Sam Neat, the human fashion plate of Dress-Up Week."

If Mr. Neat is not apprehended to-day he will appear again tomorrow noon.

## CHAMBER GETS BACK OF PLAN.

Los Angeles' Body Reiterates its Former Promise.

Repledges Aid to Secure Road for San Juan Basin.

Congressional Appropriation is Sought for Work.

Definite plans for supporting the bill before Congress to provide for the construction of a railroad into the San Juan Basin of Colorado and New Mexico have been made by the Chamber of Commerce, according to a report given out yesterday, and copies of resolutions adopted by the local organization have been sent to the members of the House Committee on Railways and Canals, urging them to give this bill thorough consideration.

This action was taken following a report to the board of directors by A. H. Nafziger, Capt. H. Z. Osborne and Charles Wier, a special committee appointed to investigate the resources of the basin after receiving an invitation from the Durango Exchange, representing the business interests of the San Juan basin, requesting the chamber to exercise its influence in favor of the bill.

The report stated that the San Juan basin, situated in the southwest portion of Colorado, is by reason of its lack of railroad facilities the least developed of any section of the country west of the Rocky Mountains. It is shut in by mountain ranges, which enclose a vast agricultural area through which seven rivers run carrying a quantity of water equal to that of all California streams south of San Francisco. Its mountains are rich in mines of gold, silver, lead and copper, and it also embraces 15,000 square miles of coal land. The basin now has a small population, but it is estimated that it is capable of sustaining a population of 1,000,000.

About three years ago an organization of business men in the San Juan country set forth the claims of the basin to the attention of the Chamber of Commerce and invited a committee of this body to visit the basin and investigate its resources. Members of the committee appointed in response to this invitation went to New York in their efforts to enlist the interest of directors of the transcontinental lines in the proposed project. It was reported, however, that various difficulties of the railroads have prevented any important extensions since that time.

In recommending their report to the Chamber of Commerce the committee said: "The enterprising people of the San Juan basin have never ceased in their efforts to get a railroad built to the south, which will enable them to trade with Los Angeles and other Pacific Coast cities. They now ask this chamber to influence the bill before Congress and your committee is of the opinion that you should assist them in any way that is feasible and possible."

## FINDS NO TERRORS IN PRISON CAMPS.

EMMA, WORKER TELLS HOW WAR CAPTIVES FARE.

State Secretary Describes Work of the Association in Europe's Great Detention Centers — Efficient Methods and Generous Treatment Found in Germany and England.

Details of the wonderful work which the Young Men's Christian Association is doing among the prisoners in concentration camps in Germany and Great Britain were told of by James A. Springer, State Secretary of the organization, at a well attended meeting held at the Hope-street headquarters yesterday. Mr. Springer removed at impression retained by some people that the detention camps are terrible places.

"That is not true," he said, and illustrated by a conversation which he had with a German prisoner in a British camp.

"How well are you treated?" he asked.

"We pray to God Almighty for our daily bread and he gives us the bread with butter," was the reply in German.

Mr. Springer spoke of efficiency in the direction and conduct of the prison camps in Germany. He visited twenty-nine in that country where Russian, French and Serbian prisoners are detained. He found the German officials extremely cordial and they told him to do what he liked, because they knew the ideas for which the Y.M.C.A. stands.

The various association secretaries who have charge of the work in the camps hold evening, Bible classes and gatherings of all kinds and their work has a marked and beneficial influence upon the men.

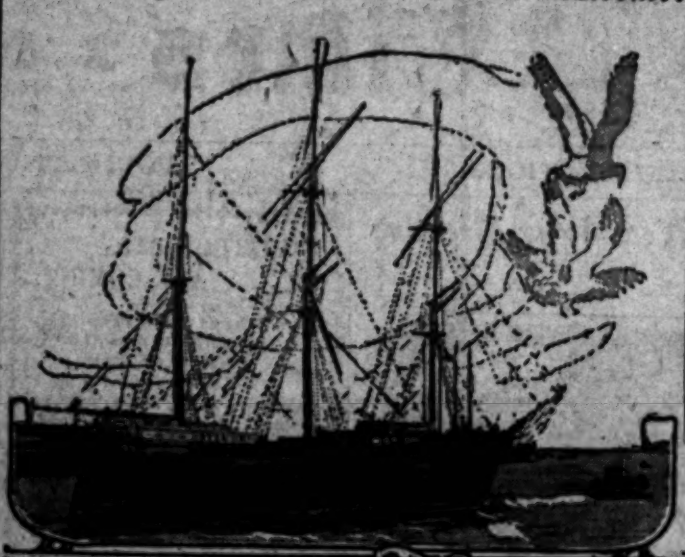

In Germany, in addition to being allowed to go freely with the men, Mr. Springer was permitted to take photographs of the camps and prisoners. In fact, he was not interfered with at all. In Great Britain at first conditions were such that none was allowed to visit the detention camps, but afterward all doors were opened to Mr. Springer.

He said he found the men in the camps very responsive to the higher ideal of Christian manhood and brotherhood.

The Children's Colds. Watch the children's colds and cure them before they weaken the vitality. Use Chamberlain's Cough Remedy freely. It is perfectly safe. It has been tested by chemists and pronounced free from injurious substances and costs but a trifle. Obtainable everywhere. — [Advertisement.]

Today begins Dress Up Week in Los Angeles. Spruce up! Radiate! Get into new togs! Be loyal to your city, your family and yourself by appearing in a new outfit of wearing apparel.

## Ride High on Boom in Ocean Bottoms.

All is fish that comes to the nets of the charter-makers these days. The bark Alden Beane, above, which was towed from the harbor to Long Beach yesterday for two trips between Seattle and Vladivostok at the rate of \$100,000 a month. The Honolulu is the property of the American-Hawaiian Steamship Company, and was, until recently, in the Los Angeles-New York service via the Panama Canal.

The Alden Beane, above, which was towed from the harbor to Long Beach yesterday for two trips between Seattle and Vladivostok at the rate of \$100,000 a month. ## On Trail of Gold.

(Continued from First Page.)

yesterday to be refitted for the South Sea service. Beginning her remarkable and romantic career in the oriental tea trade in the days when shipping men still clung to the belief that the "wild jammers" could never be ousted by steamers, the Alden Beane passed through many stages, each one lower, from a maritime point of view, than its predecessor. When her proud days in the tea service ended she became a training ship for Japanese naval cadets. Then she went to sailing between Los Angeles and Honolulu, loaded with scrap iron, canned pineapples and anything that offered. Next she became a coal barge in the harbor and then a medium picture company bought her for \$1500 and used her for scenes in which pictures were secured.

Old tub that she is, and battered as she has been in a career of fifty years spent mostly in breasting the waves of the Pacific, the Alden Beane was built by men who knew how. They made a good job of her and so by the way of San Francisco considered it worth their while to pay \$15,000 for her and to spend 10000 in refitting her for use in the South Sea trade. And the Alden Beane is not the only ancient craft which has been kept back to the sea after it was thought she had made port for the last time. There's a bunch of ghost ships which have crept out like ghostly ships from many harbors about the seven seas.

One result of the feverish demand for steamers, a demand far greater than the supply, ship shipping men, is that the Pacific Ocean is loaded with many ships, of which it never had too many. They are being transferred to the Atlantic, where the cry for more ships is heard hourly, and where any kind of a boat that can get to Europe is sure of a charter. Freight is piled up in such vast quantities on the wharves of New York and other Atlantic ports that shippers are at their wits' end to get bottoms to carry the stuff across the "herring pond."

This is why it is found that some of the boats of the Luckenbach Steamship Company and of the American-Hawaiian Steamship Company, which used to ply between Los Angeles and San Francisco and other parts of the world, are now being devoted exclusively to the profitable Atlantic trade. The Luckenbach Company has eleven boats in all, of which nine are on the Atlantic and only two on the Pacific, and they are at Panama and the last east-bound freight, which will be handled by the company until the canal is reopened to traffic.

Twenty-six boats comprise the fleet of the American-Hawaiian company and of these eighteen are on the Atlantic, according to the agent here, some running to Europe, others to South America and others to the United States coastwise trade.

The company now has one steamer loading at San Francisco for the Orient and several handling sugar between this Coast and the Hawaiian Islands. If the Pacific Ocean has lost steamers to the Atlantic since the war broke out, it also has to gain some from that ocean. As a partial offset, there is the purchase by the Pacific Mail Steamship Company of three steamers, the Venezuela, Colombia and Ecuador, which are to be used in the Pacific service. Last August the Pacific Mail company sold five famous vessels of its oriental fleet to a subsidiary corporation of Morgan's International Mercantile Marine, and these vessels immediately were placed in the trans-Pacific trade. Since that time the Pacific Mail has been buying up the war on shipping business, improved enormously. Therefore, the Pacific Mail is a pioneer in the ocean on which it was a plowman and which it only left temporarily as it happens, because of the hampering restrictions placed on trans-Pacific boats of American registry by reason of the La Follette-Purviser act.

The closing of the Panama Canal has seriously interfered with the steamship business on the Pacific, according to shipping men. When it is reopened the Atlantic and Pacific Steamship Company is expected to resume coast-to-coast trade. It now has five steamers operating under the auspices of W. R. Grace & Co. between Atlantic ports and Chile in the nitrate business. Two steamers now being constructed in Philadelphia for that company will be placed in the same business. When the Panama Canal opens and it seems certain that coast-to-coast service can be resumed without interruption, it is probable all the boats will be put back on the run between Los Angeles and New York, according to the local office.

## War-Bird Gift.

(Continued from First Page.)

and twenty others are held in reserve, constituting a force entirely apart from the regular army aviators. While the Aero Club of America is raising the funds for the purchase of the extra machines and the training of aviators, it is believed Congress should make an appropriation to cover the cost and an effort will probably be made to secure from the government the money that is now being expended.

Every aeroplane is regarded as worth the lives of 1000 soldiers and as a protection to thousands of others. For this reason the club took quick action, mobilizing every flyer who could handle one of the big military machines and will train as many more as may be necessary.

NO ROOM NOW. The aviation schools are now filled to capacity and it will be two weeks before the volunteers will have an opportunity to try out their skill with planes. These men, when they can pass certain tests, will be given the expert's licenses, will be equipped with proper machines and will not only be regarded as a necessary adjunct to the army but will be in a position to train other aviators, both military and civilian.

The heads of the National Guard of the several States are co-operating with the Aero Club and in many instances have detailed men to attend the aviation schools and learn to fly. A number of these officers will be trained here and others at the Curtis Aeroplane School, the personal expenses of the officers to be borne by the Aero Club of America.

In addition to the two local aviators named who have volunteered to take the course for the expert license, others have volunteered and will be placed as soon as vacancies can be found.

Capt. R. E. McMillen of the Nebraska National Guard, a licensed pilot, is now on his way to the Curtis school.

J. H. Worden is a veteran flyer who used his desire to enter the service from Dallas, Tex.

Adj.-Gen. George M. Cole of Connecticut promptly detailed Capt. Ralph L. Bishop and Lieut. Newton Sunderland. Capt. Taylor will immediately proceed to Newport News, where there is a Curtis school, and will take his course in the near future.

Adj.-Gen. Lloyd England of Arkansas has detailed Sergt. A. Garland Pierce.

Adj.-Gen. L. W. Young of North Carolina has detailed Lieut. D. B. Byrd.

Adj.-Gen. John C. Bond of West Virginia has detailed Lieut. Howard F. Wehrle.

Adj.-Gen. Lee S. Tillison of Vermont has detailed First Lieutenant Harold P. Sheldon.

## UNDELIVERED TELEGRAMS.

These are telegrams at the Western Union for Miss M. M. Armstrong, William Cooper, N. F. Canto, Mrs. Frances Chillea, Mrs. John Fraser, Lewis L. Flowers, Mrs. Gaiten, Mrs. Frank Jenkins, Mrs. Nathan Leveridge, Walter S. Martin, Mrs. William Malboson, George Skidmore, Mrs. Harry Stoddard, Mrs. Jane Schrekengost and H. J. White. At the Postal for Julian Armstrong, R. F. Haegelin, Robert W. Nathan, Alfred Bosworth, James M. Chiswell, L. A. Davis and Edith L. Herndon.

## WANTS TO BUY.

The Colorado River Telephone Company of Blythe, Riverside county, filed an application with the State Railroad Commission yesterday for authority to buy a telephone system now owned by Jesse Brown. The line is forty miles long and cost Mr. Brown \$1000 in May, 1915.

## WOMAN A PHYSICAL WRECK.

Tells in Following Letter How She Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Milwaukee, Wis. — "Before taking Lydia E. Pinkham's Vegetable Compound I was a physical wreck. I had been going to a doctor for several years but he did me no good. A friend told me of Lydia E. Pinkham's Vegetable Compound, so I decided to give it a fair trial, and it gave me relief from bearing down pains which had been so bad that I would have to lie down. I also used the Sanatoga Wash and it has done me a great deal of good, and I am not troubled with a weakness any more." — Mrs. P. L. BULL, 1229 Booth Street, Milwaukee, Wis.

The most successful remedy for woman's ills is Lydia E. Pinkham's Vegetable Compound. It has stood the test for forty years, which would be impossible if it did not have genuine merit.

For special advice, free, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman, and held in strict confidence.

## TO HANDLE BIG FRESNO PLANS.

Engineers are to Survey City in Matter of Sanitation and Drain Systems.

A contract whereby the members of the firm of Olmstead & Gillesen of this city are engaged as consulting engineers to the city of Fresno in the matter of the proposed voting of a \$500,000 bond issue for a sanitary and storm sewer system was signed in the San Joaquin Valley city Saturday by Frank H. Olmstead and Mayor Snow.

According to the contract, a careful survey of the city and existing conditions will be made. A study will also be made of the plans submitted by the City Engineer, and such revisions as are necessary recommended. The contract does not require the Los Angeles engineers to supervise the construction work. Frank H. Olmstead, the senior member of the firm, will have active charge of the Fresno work. Mr. Olmstead was once City Engineer of Los Angeles and more recently was a member of the county's board of engineers for flood control.

## LIMA BEAN GROWERS.

Organization Formed in Venture to Promote Ranchers' Interests. (LOCAL CORRESPONDENCE.)

VENTURA, March 24.—The lima bean growers of this county have organized a growers' association. Efforts all along have been to get as many bags of beans signed up as possible and at the gathering in this city today it was found that nearly 75 per cent of the output had been secured by the association, or 735,000 bags out of a possible 1,025,000 bags in the county.

The association is made up of eight smaller associations, one each in Camarillo, Oxnard, Buena Vista, Santa Paula, Satcoy, Mound, Santa and El Rio. Directors were chosen in each of these districts by the districts themselves, and also a delegate from each to attend to the details of incorporation. The central organization will have headquarters at Oxnard, and is named the California Lima Bean Growers' Association. The officers will co-operate with Attorney George C. Farland in taking steps for incorporation.

After incorporation, which will be along lines of a nonprofit and non-capitalization organization, a manager will be named and all officials are to conduct the business of the association with the object of keeping the bean crop at a standard and making it so viable as to demand a fair return to the grower.

## TO PLANT PALMS.

(LOCAL CORRESPONDENCE.)

SOUTH PASADENA, March 24.—Instead of giving bric-a-brac, furniture, pictures, books, etc.—the usual gifts of senior classes, the present graduating class of South Pasadena High School has decided to present the school with a dozen or more potted palms with which to adorn the driveways and walks of the school. The faculty of the school is much pleased with the class's decision, believing that while a picture or other perishable memento might last only a few years, the palms will remain indefinitely as a monument.

## A guarantee

YOU have heard and read more or less about the demoralization of the dye-stuffs and textile markets due to the war in Europe.

We want to say this:

Our clothes are guaranteed to be satisfactory to the wearer; and this guarantee is given without reservation, modification or exception.

Any man who sells our clothes is definitely authorized to extend to any man who buys them, our unqualified assurance of satisfaction; which means colors, all-wool fabrics, the quality of other materials, the tailoring, the fit, the value at the price. And the money-back if you are not satisfied.

## HARRY CARR SAYS FRED FULTON IS A JOKE.

### FRED FULTON WANTS TO TACKLE JESS WILLARD.

Knockout of Poor Old Jim Flynn Makes Fulton Consider Himself Championship Timber — And New York may Fall for the Proposed Fight — No Heavyweight in the World Stands a Chance With the Champion Today.

NEW YORK BUREAU OF THE TIMES, March 26.—Before the smell of the Moran-Willard fight is out of our nostrils they are beginning to plant another. Fred Fulton is trying to horn in as the next opponent for Jess Willard. Fred may not be much as a boxer but he is there as the world's champion humorist. The reason he advances for considering himself championship timber is that he has recently knocked out poor old Jim Flynn. Every boxer who has fought the decrepit old fireman for the last four or five years has let him stay because they did not want to get in bad with the crowd by knocking out the poor old fellow.

Fulton might as well claim to have outpointed Battling Nelson. It would not be surprising if Fulton might manage to put it over. The truth is that New York is the original sucker town. It will howl with joy over fights that would have been feared out of the ring at Vernon. The supposedly sophisticated New Yorker will dig up money to be a spectator at theatrical shows that go broke on the road where they have to stand the test of intelligent audiences. New York will fall for anything that gets enough publicity.

The Moran-Willard thing got publicity because it was promoted by Tex Rickard who blew in from Argentine with a debonaire air of mystery—a cowboy in evening clothes. Even New York squealed a little this morning about last night's fight; the criticisms, however, being poured down upon Willard for not having more severely punished Moran. But Willard is too decent a fellow. The criticism should have been directed at the matchmakers and at the newspapers, who, knowing how poor a dub Moran is, boosted the fight.

Moran was touted as the wily fox of the ring. In the ring he showed about as much brains as a mud turtle and as much boxing class as Jim Flynn. The truth is there are no heavyweights in the world who stand the slightest fragment of a chance with Willard. Scotty Monteth has a young Austrian giant named Charley Weisner, who he thinks will be a challenger of Willard some day. But he confesses it won't be for a long time.

Any man who takes the title from Jess Willard must be as big as a giant and must be able to box well. Willard showed remarkable coolness last night; he blocked and countered like a lightweight champion. He has acquired the art of letting his head go wobbly before the force of the blows. He is capable of putting up the most interesting fight that the ring world has seen in this section, but there is no one good enough to give him the fight. He will be a lonely champion. Jess belongs to the idle rich class.

### WILLARD HAS PROBABLY FOUGHT HIS LAST FIGHT.

NEW YORK BUREAU OF THE TIMES, March 26.—Jess Willard, world's heavyweight champion, has probably fought his last fight. The ten-round bout with Moran at Madison Square Garden will mark the end of the big pugilist's career. If he has his own way about his future, Willard is prosperous and he does not relish the fighting game. Anyway he is very anxious to retire and settle down to a quiet home life.

Dave Levine, of Chicago, who was the secret stakeholder of the big bout, before he left for Chicago today stated that Willard told him at the time he signed articles to fight Moran that he would not enter into any more bouts.

"Willard is a home man," said Levine, "and when I went to him a few weeks ago, representing Tex Rickard, he was not anxious to fight Moran. He was finally persuaded to do so by his manager and myself but he was not very enthusiastic about it. Willard is a rich man. He has \$100,000 right now in Chicago banks and has invested \$25,000 more in a fine home in Chicago. The champion is very fond of his family and his children are growing up and he wants to be with them as much as possible.

The contract he has with the Sells-Floto circus for the coming summer means \$150,000 for him in cash and when that is fulfilled I think you will see Jess announce that he is through with the ring forever.

ALMOST TOO MUCH. When Jess signed to fight Moran, he said: "I've got all the money I need. If I live to a ripe old age I will never spend all the money I have now. I am tired of the excitement of the fighting game, and want to settle down and lead a quiet life. My ambition has been realized and I have made the fortune I wanted to when I first took up fighting for a business."

Willard left for Chicago this afternoon alone and was impatient to get back to his family. He could not be reached to be asked if he intended to retire. He will not retire if his manager, Tom Jones, has his way. For Jones said today that Willard will be willing to give Moran a return match if he wanted it and would also take on any of the ambitious heavyweights if the consideration was satisfactory.

HAND IN SPLINTS. When Willard left for Chicago his right hand was in splints and his fractured hand was giving him considerable pain. His physician told him he should not use the hand for four or five weeks.

Willard's engagement with the circus begins on April 25 and he will give exhibition bouts with Walter Monahan at each performance. Moran would like another chance at Willard in a finish fight. He stated today that he thought after the seventh round Willard was weakening. Moran says the champion's punches did not hurt.

Wheel. DANDY EQUIPMENT FOR HILLTOPPERS. NEW L.A. HIGH TO HAVE A READ ATHLETIC FIELD. Will Have Cinderpath, 300-yard Straightaway, Six Tennis Courts, Swimming Pool and Modern Gym. Coach Featherstone Discusses Psychology of Losing Stroke.

The contract for the new Los Angeles High School provides for an athletic field that will be second to none in California. Vice-principal Oliver and Coach Goddard and Featherstone are so delighted over the prospects that they even smile in their sleep.

The plans provide for a 440-yard cinderpath, a 300-yard straightaway, six tennis courts and a swimming pool, besides an up-to-date gym. The plant will cover a total of five acres, amid a setting of green hills and typical Southern California landscape.

Do they look familiar? John Powers, owner of the Angels, Mayor Sebastian and Frank Chance watching their pets workout at Lake Elsinore. This picture was snapped during yesterday's practice and on the hottest day of the spring training.

### AD SANTELL IS WINNER AGAIN.

BY DIRECT WIRE—EXCLUSIVE DISPATCH. SAN DIEGO, March 26.—Ad Santell, the San Francisco wrestler, threw Jack White and Herman Stroh here tonight in fifty-two minutes. White's fall was gained in twenty-four minutes with a front body elevator. Stroh was beaten in twenty-four minutes when Santell clamped a toe hold upon the soldier, badly twisting his leg.

Stroh made the best showing. He had several bad holds on the northern grappler but was unable to pin Santell.

### BENNY KAUFF PUTS BALL OVER FENCE.

[BY A. P. NIGHT WIRE.] DALLAS (Tex.) March 26.—The New York National League club and the Detroit Americans divided their pre-season games here. New York won 5 to 3, by bunching hits in the eighth inning, when the score was tied. In the third Kauff's home run sent Doyle ahead of him for two scores, the first of the game. Three strikes and a wild pitch enabled Detroit to tie the score in the sixth. In the eighth New York hit Boehler for three, two-baggers, which, combined with a passed ball, netted three runs.

The score: R. H. E. Detroit ..... 2 4 0 New York ..... 3 10 3 Batteries: Covaleskie, Boehler and Baker; Anderson, Perrett and Rariden.

### LILLIPUTIAN IS FANCY ICE SKATER.

Little Jerry Bedford, an almost perfect type of Lilliputian, being considerably less than three feet in height and weighing after a big meal about forty-seven pounds, is a novelty in Los Angeles ice-skating world. He is playing an engagement at Harlow's Cafe.

Little Jerry is 24 years old and has been a public entertainer since he was a mere child. His most attractive art being his ability to sing. He has a wonderfully strong and melodious voice notwithstanding his size.

During the past year while carrying out a contract at the Baltimore Hotel, New York, he discovered that to be up to the minute as an entertainer he would have to acquire another art—ice skating. He was told he was too small, that no skates were made to fit his baby feet, but he was determined and having a pair made to order took a few lessons. In a short time he was heralded as one of the cleverest skaters in the eastern metropolises.

### FULLERTON WINS FROM CLARK'S COLTS.

[BY A. P. NIGHT WIRE.] FULLERTON, March 26.—Taking his nine hits off Olson, Fullerton garnered seven runs and won from Clark's Colts here today. The Clarkites took six hits off Kahler and scored five runs. Batteries, for Fullerton, Kahler and G. Callan; for Clark's, Olson and Slater.

### NEW BRENTWOOD CLUB ENJOYS HOUSE-WARMING.

BY ALMA WHITTAKER. WHEN a debutante country club can airily announce two successful at-home days without sending out any special particular invitations, and finds itself entertaining the country club elite from far and near—500 of 'em in two days, as the kitchen is prepared to testify—it must be excused if it spreads its tail a bit in true peacock style.

That's what happened to the new Brentwood Country Club when they elected to "entertain their friends informally" for a modest little housewarming. They had 500 visitors on Saturday afternoon and 200 yesterday, and even our Los Angeles and Mid-west nabobs could not have excused more enthusiasm.

EXCITED CROWD. The sporty little completed nine holes were crowded with investigating golfers and C. W. Pickell of the Los Angeles Country Club carried off the cup for the driving contest with 639 yards for three drives. Tom McCall, slated vice-president and flustered-in-chief, really won it, with 498 yards, but he considered it would ill-become him to swipe the initial laurels under the circumstances.

C. L. Barker of the Los Angeles Country Club won the putting and approaching contest with nine for three shots, 3, 4, 3, which really was not very stylish, for the ladies usually win theirs with 6 or 7 at most. John S. Hunt, W. S. Johns and W. Riddle each took 10, and there were lots of 11's and 12's but as it was new and unexplored territory, qu'vouliez vous?

SOCIAL ECCLAT. The social eclat of the occasion was all that could be desired and the jolly little clubhouse simply oozed class. The tea table alone was worth the visit. For it was laden with Brook-Fogues-Montgomery-Nordlinger display of startling magnificence, all the lovely silversware belonging to Mrs. May Sutton Bundy, representing the tangible trophies of world championships in tennis, covering a triumphant period of ten years; served served out of a massive silver bowl, won in a national event; tea served from the gorgeous tea set presented to her by Pasadena when she first won the world laurels in the English event, regal cake dishes, bread and butter trays galore, and tall silver vases full of spring flowers everywhere.

FOUR TEA. Numerous celebrities "poured tea" to the infinite satisfaction of the receiver, Mrs. Bundy herself; Miss Sara Verity, daughter of the steel king from Ohio; Mrs. Ralph Burdick, the graceful and charming wife of Director Burdick; Mrs. Robert Marsh, Mrs. Oscar D. Bennett, the delightful little bride; Mrs. Pascal Burke, Mrs. Louis Wood, Miss Wagner, the Misses McCall, Miss Fernand, Mrs. Gilmore Blackstone and so on, and the hostesses included all the scintillating Santa Monica set, which includes Flowers, Ogdena, Morphy, Bruce, Miss Mary Brown, Miss Florence Sutton and so on through a long list of socially interesting names. And they had a melodious orchestra into the bargain.

Mrs. Ethel Bruce, by the way, won the ladies' driving contest with 278 yards for two drives, and Miss George McCall was second with 232 yards.

COOZES SWEETNESS. But the real "hostess" of the occasion was Walter Calvert Fertig, who looks like a handsome golfer, and simply oozes tact and sweetness. He is the club's secretary and takes his duties royally and inclusively. Never a lone neglected dowager, never a shrinking wall-flower, forlorn and unappreciated, while he is there to see. The club has therefore been duly baptized and debuffed and is now open. Until the new clubhouse is built and the other nine holes of the course completed, members only have to pay half dues, but as the temporary clubhouse is the essence of comfort, replete with lockers, and three tennis courts are available by the magnificence of President Tom Bundy and Hermann Janna, all the charms of a fully-fledged club can be enjoyed.

Second-round matches have been played off in the B. handicap event at the Los Angeles Country Club. J. T. Cooper beat Thomas Ridgway, 1 up. Frank Gillett beat H. A. Barclay, 3 and 1. W. R. Gray beat M. P. Snyder, 2 and 1. C. W. Pickell beat Charlie Van Loan, 1 up. H. D. Requa beat W. S. Rickard, 2 up. C. G. Andrews won from S. F. Macfarlane by default. H. Barclay Brown beat J. M. Walker, 5 and 4.

As Mr. McMullen went to Coronado with the team on Saturday, his match with E. G. Howard has been given a week's grace.

THE COMING CHAMPIONSHIP. As the Victoria invitation tournament has been called off for next week-end, the men's Southern California championship at the Los Angeles Country Club is the next golf event on the programme, with the exception of a few team matches. The championship opens on the morning of April 12, Wednesday, and concludes on the 15th, Saturday at the Los Angeles Country Club intend making it one of the biggest golf events of the year, for they are not holding an invitation tournament this season but concentrating on the championship instead. All the celebrities available will be personally invited to participate under the new rule of the golf association to that end.

The course has undergone a vast amount of improvement, numerous desirable alterations, and no expense is being spared to make it one of the best courses in the country.

## EXCITING POLO FOR RIVERSIDE.

Coronado Stars to Enter Big Tournament.

Sunday Matches to be of Unusual Interest.

Hugh Drury Should be Biggest Feature.

(SPECIAL CORRESPONDENCE.)

RIVERSIDE, March 26.—With interest in the polo world soon to shift from Coronado to Riverside, the local polo club has announced the schedule of events for the big tournament, which opens here April 1 and continues until April 9, with play every afternoon at 2:30, except Saturday, the 8th, when the match will be played in the morning on account of the Corona road race.

**BIGGEST EVENTS.**

Emphasis is being placed this year on the Sunday events, as it is recognized that on these days the public will turn out in the largest numbers. With this in view, the two best matches of the tournament have been scheduled for Sunday afternoons. The first one, on April 2, will be between Cooperstown and the Midwick All-Stars in the finals for the Mission Inn challenge cup, and the second, on the closing day of the tournament, April 9, between a picked team of eastern players and a picked four of Southern Californians.

**DRURY TO SHINE.**

Hugh Drury of the Riverside team, whose work at Coronado this season has been a feature of the matches, will captain the all-western aggregation, and will probably be associated with three of the following four players: Bobbie Neustadt, Reggie Waters and Carlton Burke of the Midwick Club, and Maj. Colin G. Ross of the Coronado Club.

With Malcolm Stevenson of New York, who will captain the easterners, will probably be Beadleston, All-American spare man; Thomas H. Beadleston of New York, and Steven H. Valle of Kansas City. Practically the same teams will contest in the Cooperstown-Midwick match, and both events will furnish as classy an exhibition of polo as can be seen in the West.

**INTERESTING.**

The week-day matches, which will consist of regular club team matches for the Walter Dwyer trophy and the Riverside cups, will make up a series of more than usual interest, and lovers of the sport have a full nine days of pleasure in store.

Midwick, Coronado and Riverside are entered for the Dwyer cup, and entries for the Riverside cups will include teams from these three clubs as well as from two or three of the eastern clubs.

**HOWARD CHAMBERS MAY BE PITCHER.**

(SPECIAL CORRESPONDENCE.)

WHITTIER, March 26.—With the close of the track and field season Saturday, Whittier College athletes turned their attention to baseball this week. Next week is vacation and no league or even practice games will be played by the Quakers till after vacation. Light practice has been held each evening this week, with some new men reporting. From all appearances, Howard Chambers will be the chief support in the box, while Cox will catch. Brother Elliott Chambers will be at first base. He is known as both a good hitter and a good fielder. Ferguson, a recruit from the Imperial Valley, is showing up well for second base. Verle Murray will probably be at the third sack, with Finch as shortstop.

For the outfield, Wolcott, Curt, and some new men will be seen. A promising candidate for the pitcher's berth is Kimber, a Rhode Island man, who comes to Whittier from Princeton, but on account of conference rules he cannot compete in schedule games until he has been here a year.

**FREAK BALL TEAM FOR INELIGIBLES.**

(SPECIAL CORRESPONDENCE.)

LONG BEACH, March 26.—So many star high school baseball players have been debarrd from participating in interscholastic competition this year on account of the five-year ruling, that Howard Cleveland, baseball and football coach, is organizing a team of ineligible high school stars and former prep athletes to stage games this summer for the fans who lament over the lack of a city baseball team.

The team will not be a semi-professional one, but will be composed of high school and college men residing in Long Beach. It will probably be known as the Long Beach A. C. Club. The various merchants of the city are aiding in the equipment of the new team. Cleveland has already "signed up" such men as Alvin Pickett, Donald Lane, Joe Ward, Wilfred Morse, L. Wetteman, Art Anderson, Harry Rasmus and Clarence Johnson.

**HORSE RACING TO BE RESUMED.**

(BY A. P. NIGHT WIRE.)

SAN DIEGO (Cal.) March 26.—Racing will be resumed at the Tia Juana race track Saturday, April 1, according to an official announcement today by James W. Coffroth, president of the Lower California Jockey Club. Much work remains to be done before the damage done to the track by the recent floods is fully repaired, but extra forces of men will be put at work this week.

George F. Fuller, San Francisco millionaire, telegraphed Coffroth today that he was planning to buy a large stable of thoroughbreds to race at Tia Juana. Word also was received from Hot Springs, Ark. that a number of good horses would be shipped from there in time for the re-opening of the plant.

## HOPPE AND YAMADA ARE HERE FOR THEIR MATCH

THE world's two most famous billiard players came quietly into town yesterday and spent the warm day resting. These two famous ones are Willie Hoppe, champion of the world, and Yamada, the champion of Japan.

They are to play a series of matches at the Sultan parlors on Tuesday, Wednesday and Thursday at 3 o'clock in the afternoon and 3 o'clock at night. After these matches are over the two will as noisily steal away again.

**REAL PLAYERS.**

Hoppe and Yamada have been touring the country, playing matches everywhere. In that time Yamada has won nineteen from Hoppe. This does not sound like any too good a record, for they have played several hundred times. One must remember that no other player would have been able to win a game.

The Japanese player is wonderfully cool. When Hoppe starts out by running a sensational score, he sits, never blinking an eye. When it comes his turn, he rises undisturbed, with steady hand and sparkling eye and proceeds to do likewise.

**GRATIFYING.**

The trip has been very gratifying to the two players, for it has been proved by the large gatherings that they are known and appreciated. Probably the largest audiences that have ever looked to a billiard match have watched these play.

A pair of champions.

Crack billiard players, Willie Hoppe, and Koji Yamada, who will mingle in this city in a series of matches. Hoppe holds the world's billiard title, while Yamada is the champion of Japan.

## MIDWICK POLOISTS WIN THEIR FINAL STRUGGLE.

(BY A. P. NIGHT WIRE.)

SAN DIEGO, March 26.—The Midwick Polo Club of Pasadena defeated the Coronado four today in the final game of the Hotel del Coronado handicap competition, 5 to 4. The handicap allowance of four goals given Midwick was too much for the opposing team to overcome, although Coronado's score was within a quarter of a point of that of the victors until the last few minutes of play, when Drury, by a difficult shot, gave the Pasadenans a comfortable margin.

Midwick scored only two goals, one each by Neustadt and Drury, losing a quarter of a point on a safety by a goal of the team's total Malcolm Stevenson, upon whom much reliance was placed by Coronado, played a "hard-luck" game, missing several attempts at goal.

The last game of the polo season at Coronado will be played Wednesday, when the same two teams compete for the California challenge trophy. Midwick won a leg on this much-coveted prize last year, while Coronado was victorious in the two preceding years. A victory Wednesday will give the Coronado Country Club permanent possession of the trophy.

**Line-up and summary of today's scores:**

Midwick—No. 1, Neustadt, one goal; No. 2, R. Wells; No. 3, Drury, 1; No. 4, Burke. Penalty safety by Wells. Handicap, four goals. Net score, 5 to 4.

Coronado—No. 1, Valle; No. 2, Beadleston, four goals; No. 3, Stevenson, No. 4, Ross, 1; penalties, safety by Ross. Total by Beadleston, No. score, 4 to 4.

**They're Slipping.**

THE Rangers couldn't come back. Once they were the greatest soccer team that ever played in Southern California, absolutely unbeatable on the field. But yesterday at Manual Arts they were merely a mediocre team that couldn't play together. They played like strangers to each other and the farther the game went the farther apart they got. The inevitable result was a victory for the pick of the league and a score of 5 to 3 against them.

**GOOD START.**

The Rangers started like winners and the famous, confident, unbeatable team of old. The forwards went quizzing through the pick of the league as if these latter were just points to run between. The ball was shot out to Tommy Low and he very prominently ran up the field, dribbling it along and shooting it past the goal post. In fact, this Tommy Low person was conspicuous during the first half.

The second Ranger goal was made by the head of McDougall, the center forward. Tommy Low again jiggled the ball up the field, only this time he kicked up high in the air and it came down in front of the goal. McDougall let it bounce against his justly-famous head and the ball went skidding through the goal.

**FAMOUS TOE.**

The third Ranger goal was made by the justly-famous toe of McDougall. This time he kicked the ball past the goal-keeper, Greves, so fast and hard the latter was still blinking between halves.

The first score for the pick of the league came a few minutes later. The forward pack went down in a long string like a flock of ducks. Smith shot the ball in. All the Rangers laughed. The fact that somebody had been able to score on them was a huge joke.

A few minutes later the forwards of the enemy again came down the field in a straggling line. This time while the goal-keeper dived around McKenzie loomed the ball by him.

Again the Rangers laughed. It was all so funny—this stunt of having somebody else do the scoring. "Come on, boys," said one, "Let's down the field and show them a goal or two."

**WEAKENING.**

Two or three times they started, and carried the ball to the goal. Always something went wrong, but mostly the shots were too long. Then Tommy Low was left out on the wing with

A pair of champions.

Crack billiard players, Willie Hoppe, and Koji Yamada, who will mingle in this city in a series of matches. Hoppe holds the world's billiard title, while Yamada is the champion of Japan.

## Oh, Look, Girls! MIDWICK POLOISTS WIN THEIR FINAL STRUGGLE.

(BY A. P. NIGHT WIRE.)

SAN DIEGO, March 26.—The Midwick Polo Club of Pasadena defeated the Coronado four today in the final game of the Hotel del Coronado handicap competition, 5 to 4. The handicap allowance of four goals given Midwick was too much for the opposing team to overcome, although Coronado's score was within a quarter of a point of that of the victors until the last few minutes of play, when Drury, by a difficult shot, gave the Pasadenans a comfortable margin.

## TIGERS TAKE A DAY OFF.

The Vernon Tigers loafed yesterday. There was no practice in Washington. Park looked as lonely and deserted as an empty barn.

In the morning Chief Johnson put on his rubber shirt and ran a few laps to reduce some. But he slipped in and out without anybody seeing him.

The only noises at the park came from the humming of the moving machine and the click-click of Boots Weber's typewriter. The caretaker had old Dobbin out, running the mower over the grass diamond. Weber was writing letters to his friends on the opening day parade. Everybody else was at church.

and each contest is for fifty points. The games start at 3 o'clock and admission is free.

The rivalry between the three leading teams, Hills, Lyceum and Voorhees, is keen and there is some talk of a play-off after this tournament is over.

**RODGER'S LEADS.**

Rodgers of the Casino team is leading the Class B players to date with a total of 111 points, while Shellenbarger of Hills is a close second with 107.

Following is the schedule for the seventh week of the tournament as drawn up by E. H. Ellingsworth: Ball at Voorhees and Lincoln at Lankershim, Monday; Hill at Rex and Lyceum at Jack's, Tuesday; Rex at Ball and Lincoln at Sierra, Wednesday; Casino at Lyceum and Jack's at Hill's, Thursday; Voorhees at Lankershim and Sierra at Lincoln, Friday night.

## Baseball DIRECTORS MEET FOR REAL WORK.

NORTHWESTERN CLUBS TO BE ORGANIZED.

Schedule is complete and the next job is getting the teams into shape—splendid season expected. Montana Cities Should Add New Blood to the League.

(BY DIRECT WIRE—EXCLUSIVE DISPATCH.)

TACOMA (Wash.) March 26.—With the schedule completed and final arrangements made for the pennant race, the directors of the Northwestern League today turned to the pressing necessity of organizing their teams for the coming year. According to the announcement made by President Blewitt, the season opens April 26 with Great Falls at Tacoma, Butte at Seattle, and Vancouver at Spokane.

**ALL SETTLED.**

President Russ Hall of the Tacoma club declared that the final disposition of the case of Pitcher Richard Kaufman is that he will have to play with Modoc in Butte this season or not at all, as McGinnity will hold him to his contract.

"We have everything straightened out and are ready for the real serious work of the season, getting the teams together," said President Blewitt. "It looks as though we were going to have a splendid season and the Montana cities are having boom times. The lumber business, upon which so much depends in this section, is doing better than it has in years and we expect to have a much better showing."

**NEW BLOOD.**

The admission of the two cities from Montana will put new blood into the league and the way things are booming over there, we should be able to play to great crowds. Butte is crazy over baseball and Great Falls will make some of the smaller cities ashamed of themselves through the crowds that will turn out to see Hurley's men in action. I am delighted to learn that Manager Hall is going to have a chance to give his team a tryout."

**Samuel of National "Park."**

(Philadelphia Public Ledger.) Turn Congress loose to make armor for battleships and we may expect a repetition of the Federal Building style of pork barreling. You know what Congress has done in that direction? Paid \$125,000 for a Seattle swampland in which to build a postoffice. Squandered \$110,000 on a Courthouse at Tazewell which is used less than a week in a year.

Given 6000 people at Gainville a postoffice costing \$150,000 and bestowed upon the Wyoming metropolis of Evanston—population 1200. Federal palace costing \$125,000, where a court may hold a couple of days out of every 365.

There are dozens of other equally notorious examples of political work at Washington in the matter of public buildings. Wouldn't there be a fine crowd when Uncle Sam started in log-rolling for armor plate plants?

**Certainly Less Annoying.**

(Washington Star.) After studying the case of Warden Osborne, Col. Blaine may decide that his idea of turning the convicts loose without stopping to make men of them was the better way, after all.

**Right in the Neck.**

## ANNANDALE GOLFERS ARE WALLOPED BY VICTORIA.

(BY DIRECT WIRE—EXCLUSIVE DISPATCH.)

RIVERSIDE, March 26.—With only three regulars on the team and one player participating in his first tournament, the Victoria Club golf five defeated Annandale here this morning, 3 and 2, in both scratch and handicap events. Play was not exciting in any stage, only one contest going to the eighteenth hole for decision.

A. E. Childs, acting captain of the Victoria team, defeated E. N. Wright, 3 and 4, in scratch and 3 and 4 in handicap. Childs is playing with ten handicap and Wright with four. Dr. C. P. Hebert, playing with twelve handicap, won over P. F. Diess of Annandale, 5 and 3, in scratch, and 7 and 4 in handicap. Diess is handicapped six in association.

## BOWLING NOTES.

Play in the Merchants and Manufacturers' bowling league tonight shows a number of interesting contests.

The Royal Blue Company was their worst and lost the league, while the C. R. Baker club won their third and only one.

The C. R. Baker club held the single game score record to 219.

Corn had a strong last week and dropped his average four points, but still holds the honor roll.

All of the teams are showing the effect of practice and the players are now competing with "Leaves" more frequently than at the start of the season. The standings:

Club	W	L	W. P.	W. P. P.
Royal Blue	1	0	1.00	1.00

**THIS WEEK'S SCHEDULE.**

Monday, March 27—Allan L. C. R. Baker vs. C. R. Baker, 10-11; C. R. Baker vs. C. R. Baker, 12-13.

Tuesday, March 28—Allan L. C. R. Baker vs. C. R. Baker, 14-15; C. R. Baker vs. C. R. Baker, 16-17.

Wednesday, March 29—Allan L. C. R. Baker vs. C. R. Baker, 18-19; C. R. Baker vs. C. R. Baker, 20-21.

Thursday, March 30—Allan L. C. R. Baker vs. C. R. Baker, 22-23; C. R. Baker vs. C. R. Baker, 24-25.

Friday, March 31—Allan L. C. R. Baker vs. C. R. Baker, 26-27; C. R. Baker vs. C. R. Baker, 28-29.

Saturday, April 1—Allan L. C. R. Baker vs. C. R. Baker, 30-31; C. R. Baker vs. C. R. Baker, 32-33.

Sunday, April 2—Allan L. C. R. Baker vs. C. R. Baker, 34-35; C. R. Baker vs. C. R. Baker, 36-37.

Monday, April 3—Allan L. C. R. Baker vs. C. R. Baker, 38-39; C. R. Baker vs. C. R. Baker, 40-41.

Tuesday, April 4—Allan L. C. R. Baker vs. C. R. Baker, 42-43; C. R. Baker vs. C. R. Baker, 44-45.

Wednesday, April 5—Allan L. C. R. Baker vs. C. R. Baker, 46-47; C. R. Baker vs. C. R. Baker, 48-49.

Thursday, April 6—Allan L. C. R. Baker vs. C. R. Baker, 50-51; C. R. Baker vs. C. R. Baker, 52-53.

Friday, April 7—Allan L. C. R. Baker vs. C. R. Baker, 54-55; C. R. Baker vs. C. R. Baker, 56-57.

Saturday, April 8—Allan L. C. R. Baker vs. C. R. Baker, 58-59; C. R. Baker vs. C. R. Baker, 60-61.

Sunday, April 9—Allan L. C. R. Baker vs. C. R. Baker, 62-63; C. R. Baker vs. C. R. Baker, 64-65.

Monday, April 10—Allan L. C. R. Baker vs. C. R. Baker, 66-67; C. R. Baker vs. C. R. Baker, 68-69.

Tuesday, April 11—Allan L. C. R. Baker vs. C. R. Baker, 70-71; C. R. Baker vs. C. R. Baker, 72-73.

## RIALTO.

Between Acts.

## STARLAND SPARKLES.

## MAY ROBSON PLAYS TRICKS ON OLD FATHER TIME.

By Grace Kingsley.

May Robson, who brings "The Making Over of Mrs. Matt" to the Mason next week, absolutely refuses to be over 40 years of age, on the stage or off.

"Of course, my grandchildren are growing up," she says, "but what of it? Being 49 years old is a state of mind, not an age, and that's all I ever intend to be. To be sure, when a certain day in the year comes around, I allow my friends and family to bestow presents on me as a mark of their esteem, but it is never because I'm more than 40, and hasn't been for the past fifteen years."

**Back to the Spotlight.**

Low Fields is reported to be intending to spend the big money he made in pictures out here in the production of a musical comedy in which he will play the principal role. Fields is now in New York.

**"Surprise" Events.**

Tonight at about 9 o'clock (or shortly thereafter), just before the Mae Marsh photoplay, "Hoodoo Ann," takes place, a comedian, whose name is a household word in every street car, will appear in person on the stage and entertain for about fifteen minutes. Tomorrow, slight Douglas Fairbanks will appear in person, and tell a few humorous stories. Elizabeth Ward, a well-known vaudeville comedienne, will be heard at 4 and 5:30 p.m., daily, at the Majestic in a number of songs.

**Cupid Notes.**

Miss Marion Vadie, the very charming dancer who won our hearts at the Orpheum last season, announces her engagement to Otto Gysi, the violinist. Gysi is about to make a South American trip and Miss Vadie is cancelling her vaudeville engagements to make a honeymoon trip with him.

**Gaby Freed.**

Gaby Freed continues to put, she just won't make up with Harry Flood. Her latest peevish over the fact that Flood's sister is wearing copies of her (Gaby's) gowns in her vaudeville act.

**Jasper Shiff.**

"Young America" has closed its New York run, contrary to the verdict and prophesies of the critics. Some of the actors are out of a job, but the canine leading man, Jasper Dunn, ate up last week's salary in the form of a big steak and at once accepted a vaudeville engagement. He will be seen at the Orpheum this summer.

**Gertrude Wonders.**

Gertrude Hoffman disguised herself in some clothes yesterday morning and took a run down to Venice. Which reminds us, Miss Hoffman was introduced at tea to a society lady the other day. The lady was quite gushing, but finished her remark with: "Why I saw you on the stage the other day, but I didn't recognize you at all today!"

**Dearest Stuff.**

Hamed Shiff, who plays the hunchback in "Hummer," is half Arab and half French. He was born in Algeria, and knows the desert like a Bedouin. He was lost in the great Sahara when he was a child of eight, along with several members of the caravan with which he traveled. He says his clearest memories are of the terrible thirst he endured, and of the marked mirages. He brought back to civilization by a company of French soldiers traveling in the sands, and was adopted by one of them.

He says he never allows himself to get over-thirty nowadays. But his drink is water of the vintage of 1915.

**Red Sea Talked to Gertrude.**

Ide St. Leon and Gertrude Hoffman were friends a few summers ago, when both had summer cottages on Sea View. The dancer worked out all her dances there by the sea, and seemed to find inspiration in the sound of the waves.

**Just for That.**

Harry Marshall of the Orpheum is the guilty wretch who wrote "On the Fifth Floor" and got all the substantiation in wrong. He danced with Brooklyn, Newark, Hoboken, or any of those resorts, he moans. "The wretch won't listen to me, and the husband won't listen to me, and all because of that dirty."

**Sub Note.**

The Pullas Pictures players are still talking about their experience in the San Bernardino when they were snowed in recently during the production of "Davy Crockett." "Dusty" Farnum was required to carry Papa Peters up a steep grade, and between Peter's 185 pounds and the rafted atmosphere, it was just all he could do to make the top. Putting all his energy in his last heave, "Dusty" reached the summit with a cry of "excelsior!"

And then the atmosphere became extremely warm.

The cameraman had realized all too late that he had run out of film before "Dusty" had made half of his journey.

**Health Note.**

Hugh Adams, one of the Signal's corps of actors, this week received permission from his physician to remove the plaster cast which he has been wearing on his arm since breaking it in the production of an earlier installment of "The Girl and the Game" series.

**Dearest Vaudeville.**

Another of the trustful P.A.'s dreams is rudely shattered. George Lee and his six girls are at the Hip this week, and the P.A. is simply issuing a challenge to the women of the Los Angeles Country Club for a match any morning this week. Now he discovers that while the Lee Girls wear their costumes and carry their clubs right jauntily, none of them knows the difference between a "bunker" and a "green" or for a tee, they'd ask "green" or "black?"

**Kathryn in Second Run.**

That Kathryn Williams is a very popular film star is proven by the fact that her serial, "The Adventures of Kathryn," made by Selig, has been revived, and is being shown in Chicago after a retirement of three years. This is said to be the first serial ever revived.

Miss Williams is probably the most successful film actress in dealing with animals who is before the public today. She is fond of them, has many pets among the wild creatures of the

## Artists of Ballroom Dance.

The Vernon Castles.

Who are appearing on the screen in "The Whirl of Life," now in its second week at Tally's Broadway.

**Selig Zoo, and refuses steadfastly to work for any keeper who is cruel to the animals in his charge.**

Nevertheless it is most trying work, she says, and so great has been her success as a dramatic actress in the picture since the Kathryn thrillers, that she will probably not be asked to risk her life again in the hazardous wild animal pictures.

**Grace Warkles New Ones.**

Grace Cameron, who headlines the Pantages bill this week, brings some new songs with her, never before heard on the Coast. Most of these were written especially for the young woman.

**Gets New Birth.**

W. F. Fitzgerald, well-known theatrical man, has resigned from the Triangle Company to accept a position with a big eastern theatrical concern, it is said. Mr. Fitzgerald was formerly connected with the John Cox office in New York City, and came to Los Angeles for his health.

Whether involuntarily when Fitzgerald is one of the very few real box office experts in the show business.

**Lingham Fits.**

Thomas G. Lingham, who for some time past has been playing roles in the Kalem Company's productions, this week joined the Signal forces at their Los Angeles studios, where he is to appear in one of the principal parts of McDougal's production of Frank H. Spearman's story, "Whispering Smith." Lingham is well known both on the stage and screen.

**Some Zoo.**

The Signal corporation this week laid the foundations for a zoo to be maintained in connection with their western studios. The start was rather involuntary when Helen Holmes signed an express receipt for a mysterious package from New Orleans, which when opened proved to contain an opossum. This raises the Signal's zoological exhibits to four, sometimes varying to five when an aged coyote crawls into camp at night for shelter.

The other creatures are a bull pup, a colts and spitz, all presented to Miss Holmes by admirers.

**A Really Nice Man.**

Can you imagine a tramp or hobo who does not drink, smoke or chew, besides having other qualifications fitting him for life membership in the Signal? Well, that is the case of James Gordon, known as "The Tramp Caruso," who appears at the Pantages this week, holds that record. Manager Williams is greatly enthused over Gordon's qualifications as a headliner, possessing as he does a rich baritone voice. Gordon is said actually to have a troupe of men in constant attendance, who have been in almost every city in the Union.

**Out Among 'Em.**

Beverly Griffith, who has been assistant to Henry McKee in the direction of thrilling film stories at Universal City, was detailed a few days ago by H. O. Davis, vice-president and general manager of the Universal Film Manufacturing Company, to proceed immediately to Mexico and join the United States Army in pursuit of Villa, and secure photographs of fighting and any other subject interesting to the U.S. armed forces.

Griffith was accompanied by Gilbert Warrenton, camera-man.

## PAL HEN PENS ANOTHER.

Famous Character of the Motor-racing Sport Shows up at Corona After Long Absence from the Lighthouse—Invites His Friends to the Grand Prize Race at Circle City.

**CUR ONAH, KALL.**  
Marche Twenty 4-1916.

dear Al.—

When I have got this letter from you I'll know where I am at and what I am doing then. I can be by the top of the letter head where I am and I am at the driving city to be in the Cur Ona grand Prize classic race, and that ain't no bull neither. I know me Al.

I never scene me in no Akroft races Al B—cause my kar had 3 many wheel bases and was eating up 3 many tires in the practice but I am classy at this 165 miles race on the grand Boulevard uv Cur Ona. A few days after April fools Day which is on Ap. I want to smoke on the grand Date. Not no cigarettes like c-shaks or Mal-i-Queenie or rich man straight but that is slang talk frame which I learned when I was in the Indian apples race at the Indian apples speedway last year when Art Klein some times called Kleinart like a new kind uv overalls or shirt waister or something, got kicked off the korse for smoking only he wasn't smoking but his motor was and he got kicked off the korse by the 3 A officers and watch my smokes really means I am a lot of class.

Edgy Pulling on that Mercer is a lucky gob but he never was lucky last Sunday when he got 4 tires blowed up or sandpapered off or something like that and he only had 2 get 3 more yards on Frank Eliot, no relation 3 Rowdy and he's uv got the 2nd money in the Horsetraining Parashoot race with the Satus kar but he's lucky he never got sealed up in a kasket and shipped away and his friends bought him a lot of flowers when he never new it and his lucky 4 him, Jim Parsons, that they was a natural guard rail around that bump in 3 when the tire expo-loaded.

**LUCKY JIM.**

This Jim Parsons fellow is a lucky bum but he had lowkey luck Sunday when he blowed a tire on the turn and he only had 2 get 3 more yards on Frank Eliot, no relation 3 Rowdy and he's uv got the 2nd money in the Horsetraining Parashoot race with the Satus kar but he's lucky he never got sealed up in a kasket and shipped away and his friends bought him a lot of flowers when he never new it and his lucky 4 him, Jim Parsons, that they was a natural guard rail around that bump in 3 when the tire expo-loaded.

I never went in 2 that San Diego 3 police race yesterday because they never invited me and it was a luvving lot of me and my friends and it cost me a lot of koin and my wife which is now back from San Francisco will be sore on me because I had taken some other fellows into the race. But I should worry about that race when they is a swell race at this Cur Ona. I had a hidra miles 4 a reel purse uv 12 thousand \$'s and I got a fat chance 3 win. I know me Al.

Only lately did I know that U was the 3 A misrepresentative and was glad it because U are a good friend of mine and maybe U will slip me some koin to come to the race or when I don't get some as a entry or driver or something and maybe when I don't qualify in the race for speed I will appoint me a official or something I am a good starter and started a lot of stuff with Sam Ke's kula-boola dancers one time, U know me Al.

**War's Settlement.**

**BIG INDEMNITY AT WAR'S END.**

**WILL BE HARD TO COLLECT FROM DEFEATED PARTY.**

France Grew Prosperous When Paying the German Demand, but the Expense of the Present War Will Run to Such an Enormous Figure It Will be Serious Question.

[Philadelphia Public Ledger.]

"The exaction of a large indemnity as a part of the terms of peace in the present war is, I believe, out of the question," declares Joseph King, member of Parliament from Somerset, who has figured in the House of Commons for the last five years as an expert on economic questions.

The question as put to him was, "At the close of the war will it be possible, and if possible, will it be good policy, for the victors to impose a heavy money indemnity on the vanquished?"

In his reply Mr. King naturally assumes that the entente powers will be the victors, but he insists that they have little to gain in an effort to extract indemnity from Germany and her allies.

"Of course," he says, "we hear many Englishmen remark: 'Certainly, we shall make Germany pay every penny we can get out of her, and we shall go on fighting until we can get terms which are a damn in duration.' But, sounds simple, but is it possible? The imposition of an indemnity is a complicated and difficult question."

**BOOMERANG TO GERMANY.**

"Take, for example, the huge indemnity paid after 1871 by France to Germany. As a consequence of this the prosperity and trade of France recovered more rapidly than Germany, while Germany was depressed and suffering. Bismarck himself acknowledged this, and economists in both France and Germany attributed it to the way in which Germany received her French indemnity payments.

"A subsequent war, claims for indemnities in money, even when made by the victors, have not been pressed because of the immense difficulties which they present.

"Any indemnity commensurate with the range and losses of this war must be taken at a huge figure. Five billion pounds is less than the British Parliament has already voted for the war, may be taken as the lowest figure likely to be named. Now, taking a total of 5,000,000,000, France was able to do this by buying credit bills in London, Amsterdam and elsewhere. One-third of a billion dollars' worth of bills were bought in London, for English trade had been brisk while Germany and France were fighting, and London bankers had been able to sell French and German armies had been spending.

I never told U I quit the moving picture business because I never got much \$ and never cared to be a entry man all the time and the directory any of the directors ever left their cane home what they carry to protect bust them on the Casa Verdura or Tia Juana, U know me Al.

Last week I seen in The Times paper where Frank Walster was in the city and I called up the police station and asked for the deputy chief and doktor Hiller told me he wasn't registered there. Gene Doyle told me to look for him at the auto race and I had him Paiged there and he never came out. I bet he stayed away because he was afraid I would cop his car. I know me Al, and I saw Frank Walster Holbrov what was a swimmer and he told me my wife Min was back from San Francisco 2 look out if she caught me away from the ranch in Imperial Valley where I should be and making the fur for a new Marmon auto fur her birthday and I promised when I was with Al G. Faulkner one pite in church or some place like that. I never seen U Al about the job I had in a cabary show on springs street and how I was a howling succom and got paid for howling about the end of perfect day and doing the Baron Moch a Maroon dance and then the manager put in a refrigerator pool table and all us girls and other entertainers got the gas and mine was big as a wash tub. When I was singing in the cab-ray show next time I'll be in the club with the Auto Club and he told me that the Club recovered my Packard what some guy stole from in front of the club and he told me that I joyrided it with Bobbie Mc Bride and Vic Davidson from Imperial valley and Herb Simon and Gay Buckingham with Johnny Walker and I was in the right until we tried to climb a telephone pole and it got busted a little.

**THIF PROMISE.**

If U go out to the U. S. C. not university but U. S. C. College at Fred Kelly if he wants to get a job in the Maxines, they are the fellows U tell it 2. And if he does tell Gene Balle and Ed Tashkey and they won't be no federal krape on no doors if they go to war and get shot up by a lot of Maxine soldiers and when they see clarence Bennett I tell him to not worry because I am going to pay him that 46 sence I owed him 4 about 3 years ago. I'll be in the club with Cliff Durant and Al Koeh, U know me Al.

Then U come up to Ker Ona bring all the koin U want and I'll be up and I will see U have a good time on the Grand Boulevard an introduce U to all the regular fellows, W. L. Peeler, F. J. and the best of the sportmen which put up the 12 thousand \$'s 4 the Grand Prize race April 4.

**Y. old Pal,**

P.S. did Watt Moreland get that new touk yet and ask Ovis Bird to cut down the perr tree in front of the colonel's house before Capt. Rys comes back to town.

**War's Settlement.**

"The neutrality and activity of England made the indemnity easy. In the circumstances of the present war, such a neutral trading and banking countries exist.

"If Germany has to pay a huge indemnity she cannot do it by shipping her goods to neutral countries, and she cannot pay by creating fresh debts. She can pay only by her commerce or productive industry. If her commerce is stopped, and shipping and trading have been cut off, she is at once in full swing, immediately the war ends, she might soon be paying indemnity. But her men will be gone, her credit vanished, her system overturned. The possibility of paying under these conditions seems remote.

Germany's wonderful productivity and trading enterprises are to be revived after the war in order to pay indemnities to her enemies. It means that her enemies will have to wait a long time before they can get their money back. The possibility of paying under these conditions seems remote.

"Will they want to encourage trade with her, while their own mills and workmen are depressed and perhaps still full of the spirit of the allies who have been protectionist before, notably Russia, become free trade in order that German workers may produce goods for the victors?"

"Writers who have studied the subject are agreed that a nation which proves victorious in war may wish to exact a heavy money indemnity on the vanquished only under very exceptional circumstances, and three conditions are requisite: The nation paying the indemnity must be very wealthy; it must be immeasurably weaker in military strength than the victor, and the war must be of short duration.

"There is one possible way, however, in which the equivalent of an indemnity might figure in the allies' peace program.

"The most direct and greatest war net and astonishing methods of warfare and action have been widely introduced, old traditions and conventions have been broken down, and the victors may not be so after the war that new proposals for peace will be put forward."

By instance, why not require Germany to supply so many tons of steel, cement, timber, stone, bricks for rebuilding devastated Belgium? Why not agree to trade conventions that would allow the allies the benefit of mutual trade and commerce? Why not get certain advantages over land rates between the west of Europe and Russia across Germany? And other similar concessions will readily occur.

**Pulling the Leg.**

[New York Medical Journal.] Obsolete cases of sciatica are cured by stretching the leg for about three weeks. The method is to attach long strips of adhesive plaster from the upper part of the thigh to the ankle, inside and outside the leg, attaching them by spiral strips of plaster and fastening them to end in a stirrup with a cord leading over a pulley on the foot of the bed. A weight is hung to the cord. This is at first of eight or nine pounds, but is gradually increased to about double.

**THE SUPREME COURT.**

**No Justice has Yet Served for Thirty-five Years.**

[Philadelphia Public Ledger.]

The Supreme Court is now made up of comparatively new justices. Chief Justice White is the oldest and he has served twenty-two years.

Of the original Supreme Court, Cushing served the longest, or twenty-one years; but soon after very long terms became the rule.

Bushrod Washington was on the bench thirty-one years, John Marshall thirty-four, William Johnson thirty-one, Joseph Story thirty-four, John McLean thirty-two, Joseph Wayne thirty-two and Roger B. Taney twenty-eight. In recent times S. J. Field and J. M. Harlan outlasted all others each with thirty-four years.

No Supreme Court Justice has ever reached thirty-five years, although four have passed thirty-four.

One of the greatest judges was also the youngest. Joseph Story was only 32 when he went upon the bench.

Washington, who had studied law in James Wilson's office in Philadelphia, was the youngest of his immediate Uncle George, was but 36 when he became a Supreme Court Justice.

**Monument to an Apple Tree.**

[Popular Science Monthly.] Perhaps one of the most curious monuments in existence has recently been built in Ontario by Canadians.

The farmers have just erected a marble pillar to mark the site on which grew a famous apple tree. More than a century ago a settler in Canada made a mark on the site of the tree by a small pile of stones.

At the request of his immediate Uncle George, was but 36 when he became a Supreme Court Justice.

The apple tree was a wild apple tree, named it McIntosh red. The apple became famous; seeds and cuttings were distributed to all parts of Canada.

At the request of his immediate Uncle George, was but 36 when he became a Supreme Court Justice.

Dr. Charles E. Deuel,

Rector of Trinity Episcopal Church,  
Santa Barbara, who will be the  
speaker at the noon Lenten service  
this week in St. Paul's Pro-Cathedral.  
He will give his first address  
today.

For All

### DAILY LENTEN SERVICE.

Dr. Charles E. Deuel, Rector of Trinity  
Church, Santa Barbara, to be  
Speaker this week at Noon-  
day Services in St. Paul's  
Pro-Cathedral.

Dr. Charles E. Deuel, rector of  
Trinity Church, Santa Barbara, will  
speak at the daily noonday Lenten  
services in St. Paul's Pro-Cathedral  
this week. Dr. Deuel is comparatively  
a new comer in the diocese of Los  
Angeles, but is a man of broad intel-  
lectual attainments, with a keen  
sense of humor, and a clear, out-  
spoken manner in speaking. At the  
men's missionary dinner of the Epis-  
copal church last May, he was one  
of the principal speakers.

The subjects of Dr. Deuel's ad-  
dresses, beginning today and contin-  
uing through Saturday, are, in rota-  
tion: "Temptation," "Courage," "A  
Certain Rich Man," "Drifting," "The  
King's Highway," and "Motives."  
The attendance at these noonday  
services during Lent has been larger  
than for several years past; and on  
the average has greatly exceeded the  
previous record. Saturday Rev.  
George Davidson of St. John's closed  
his series of addresses with one on  
"Christian Hunger." Nonesentials  
are brushed aside in these services,  
the things about which Christians dif-  
fer are laid away, and the funda-  
mental doctrines and teachings of the  
church are brought out fearlessly and  
effectively.

St. Paul's Pro-Cathedral is cen-  
trally located on Olive street, oppo-  
site Central Park, and, except for the  
Roman Catholic Cathedral, is the  
only downtown church having noon-  
day services. The seats are free and  
the public is welcome.

Successful.

### CAMPAIGN TO MEET

PROBLEM OF MONEY.

TEMPLE BAPTIST WORKERS GO

INTO MANY HOMES.

Fifty-seven Teams in Automobiles  
Swiftly Cover a Wide Territory,  
Securing Subscriptions with Which  
to Meet Seventy Thousand Dollars  
of Annual Expenses.

Grappling with the problem of hav-  
ing to raise \$70,000 a year for its own  
expenses and \$40,000 a year for mis-  
sionary objects, Temple Baptist  
Church inaugurated a new system of  
securing pledges of regular sums yester-  
day when the home of every mem-  
ber of the congregation was visited.

Rev. John Bentzien, associate pas-  
tor, who gave his personal attention  
to the management of the swift cam-  
paign, stated last night that re-  
sponses were received from a large  
number of people. New contributions  
were promised and increased sums  
from former members. Each person  
called on was asked to pledge a cer-  
tain sum every Sunday and packages  
of envelopes were left at each home.

Two hundred workers participated  
in the round-up of pledges. These  
met for luncheon at the basement of  
the church and after receiving in-  
structions from Rev. J. Whitcomb  
Broughton, the pastor, and Rev. Mr.  
Bentzien, they formed themselves into  
fifty-seven teams and started in auto-  
mobiles to call upon the 1200 families  
represented in the church's mem-  
ber-ship of 1800 persons. Los Angeles,  
South Pasadena, Pasadena and other  
cities in which members reside were  
visited. The final results were not  
checked up last night but the reports  
made were sufficient to justify the  
statement by Rev. Mr. Bentzien, that  
the campaign was successful. A re-  
port will be made to the congrega-  
tion Wednesday evening at the regular  
church meeting.

"The financial problem of Temple  
Baptist Church is a very big one,"  
said Rev. Mr. Bentzien. "More than  
\$100,000 is the sum of our expenses  
and \$40,000 is given through the  
objects of the church for missionary  
channels of the church more than \$75,000 in  
all. The greater part of this comes  
from the people of ordinary means."  
Assisting the manager of the cam-  
paign were Mrs. W. H. Neeland,  
church visitor; Miss Grace Wachob,  
assistant to the Sunday-school su-  
perintendent, and the following captains  
of the teams: Carl Christie, Dr. F. A.  
Ward, C. N. Turner, Arthur J. Gatter,  
John Knox, C. E. Murdock, R. H.  
Morse, C. L. Hubbard, J. F. Maybury  
and J. S. Hadden.

All Aboard for San Joaquin Valley.

## Fire-Bomb Found.

(Continued from First Page.)

cards with her sister, Mrs. Molly  
Callitino, when the fire started. Mrs.  
Callitino verifies the statement.  
They were in the midst of a crib-  
bage game, when friends rushed into  
the building and told Mrs. Marra that  
her house was afire. Mrs. Marra faint-  
ed. When she recovered, she hurried to  
her home, and when she saw it stand-  
ing she fainted again, having to be  
revived by a doctor.

The furniture in the Marra part of  
the household was insured for \$1000.  
At the time of the fire Mr. Marra was  
at work at No. 408 West Sixth street.  
He had the insurance policy in his  
pocket, the detective report. Detect-  
ives Kirby and Williams are investi-  
gating further.

Shortly after the Marra fire an  
unoccupied house at No. 2121 East  
Eighteenth street was discovered in a  
blaze. The fire started in a small at-  
tache room, where it was difficult to fight  
after stifling the flames, the flames  
found the upper part of the house lit-  
tered with oil-soaked rags and papers.  
The owner of the property is A. M.  
Powell, No. 1128 Mateo street.

### WANTS TO WAIT.

The Union Home Telephone and  
Telegraph Corporation, serving many  
Southern California cities, filed an ap-  
plication with the State Railroad Com-  
mission Saturday for permission to  
postpone full compliance with the  
law requiring certain standards of  
equipment of pole lines, cables, wires,  
etc., to promote safety. The company  
says it is proceeding with these  
changes as fast as its funds allow.

Today begins Dress Up  
Week in Los Angeles. Spruce  
up! Radiate! Get into new  
togs! Be loyal to your city,  
your family and yourself by  
appearing in a new outfit of  
wearing apparel.

Try Muriel Eye Remedy

A PLAYER  
for your  
OWN PIANO

Why "trade in" your old  
piano at a heavy discount  
when you want a piano  
player? You can now, in  
a day's time, have a

FLEXOTONE  
Electrelle  
PIANO PLAYER

attached to your own piano,  
in your home.

The Flexotone will open your  
eyes to the possibilities of tone  
and expression that a piano  
player can give you.

For in its Flexible Expression  
Control the Flexotone Electro-  
tune offers you a mechanism  
as delicately sensitive to the  
player's wish as the fingers of  
the artist.

The Flexotone can be installed  
without marring your piano, or  
spelling its appearance in any  
way. It does not interfere with  
hand playing, and is out of sight  
under the keyboard when not  
in use.

The Flexotone Electro-tune is not  
expensive.

Why not a demonstration at  
our store? Let us play your  
favorite pieces.

Installed only by

Sports Suits—in green, rose or white flannel..... \$20  
Handsome Coats—for dress wear; in poul de soie, gros de Londres, faille and novelty moire—black, navy, Belgian blue and gray, with fancy linings, \$55 to..... \$82.50  
—and puts in tan checks with overalls; smart as can be..... \$35  
(Garments; Second Floor)

## Progress of Southwest's Great Mining Revival--The Latest Developments

BUSY DAYS IN  
OATMAN FIELD.Continuous Activity is the  
Maxim of District.Several Mines Near the Stage  
of Tense Interest.Scope of Development Steadily  
Broadening.

[SPECIAL CORRESPONDENCE]

OATMAN (Ariz.) March 24.—Continuous activity is the keynote in the Oatman district. Night and day the companies are working. Shafts are being put down with all possible speed and crosscuts and drifts are being driven into the earth in every direction.

Main street in the town of Oatman presents a scene that rivals the early days of Goldfield. There is a hustle and bustle everywhere. The new Bank of Oatman block has been completed, and is also the 125,000 Fisher Building.

While no startling new strikes have occurred this week in the district developments are productive of high interest. New projects of much consequence are being started, and the range of exploratory work is constantly enlarging as a result of these.

The Tom Reed, Jr., controlled by prominent Los Angeles and Pasadena people, is pushing work with all possible speed. The No. 2 shaft is down 160 feet, and the rock secured is very prominent. This company has its plant fully installed and under the supervision of Ed C. Jacobs, a noted consulting engineer of San Francisco.

It is the intention of the management to sink the shaft to a depth of 500 feet and crosscut to the vein.

A number of camp buildings have been erected on the quartz property, formerly known as the Armistead group. The galloways frame is up and all road work has been completed. Application for listing the company's stock on the Los Angeles and San Francisco stock exchanges has been made.

FORM COMPANY.

Frank Keith, Wallace Keith, George W. Long and other men connected with the United Eastern Mining Company have formed the Black Range Extension Mining Company, and announce that a campaign of development work will shortly be under way.

The shaft of the Oatman North Star, controlled by A. C. Parsons of San Francisco, is down seventy-five feet. The company has 240 acres of ground about a mile from the heart of the town. R. R. Moore, formerly engineer for the Selly Smelter Company, is in charge of the work.

Active work has been started by the Arizona Central, of which Charles E. Knox of Tonopah is president. The company has the shaft down thirty feet, and will shortly install complete outfit of machinery. This company is controlled by a number of New York interests.

The Ivanhoe Consolidated is crosscutting to the vein on the 500-foot level. They are now in about fifty feet. On the 200-foot level they encountered the vein at a distance of 390 feet from the shaft.

COMPLETES STATION.

Big Jim has completed a station and sump on the 500-foot level and crosscutting will be started during the coming week. The vein on the 400 level was encountered 140 feet from the shaft.

The shaft on the Argo is down 340 feet. The company is sinking the shaft at the rate of from five to seven feet a day and it is expected that in fifteen days they will be crosscutting on the 400 level to the vein.

The OUI Edge is crosscutting on the 100-foot level and is sinking its shaft to the 500-foot level.

M. J. Monnetta, vice-president of the Citizens National Bank of Los Angeles, in company with Col. V. M. Backus, Jno. O. Hassell and others, has secured the New Years property located in the heart of the Oatman field. The company has formed the Mohawk Central Mining Company of Oatman.

Machinery for the Oatman Mining is on the way to the company's ground. Development work is well under way. The company is sinking a three compartment shaft which will be sent down 500 feet.

The Carter has finished retimbering and strengthening its shaft. They are now sinking from the 250-foot point to the 500 level.

The Boundary Cens has reached the 700-foot mark in the shaft and is now cutting a station. They will crosscut the latter part of the week.

DENT REPORT.

The report that the Arizona-Tom Reed is contemplating the increase of their capital to \$1,100,000 is officially denied. The company's capital is \$1,000,000. The company is now breaking ground for the erection of a new hoist, compressor, receiver and blacksmith shop and buildings for the new 500-foot shaft. This shaft is being put down by hand drill, pending the arrival of the other machinery.

Arizona-Tom Reed property consists of 140 acres; seven patented and twenty unpatented mines with five separate veins within one area, the main Pioneer being the center; the Lila and Dewey veins being on the east.

A complete plant, including hoist, compressor, power drill, blacksmith equipment, head-frame, etc., has been ordered by the Sun Dial Mining Company, and this will be placed as soon as it arrives in Oatman. A road is now being graded to the property, and Engineer A. F. Carper will superintend work.

An operating shaft will be started immediately, and the foundation is to be put in for the installation of the machinery.

Between 6 and 9 O'clock Saturday evening, the Times telephone switchboard was jammed with "What about Oatman?"

## IMPETUS TO DREDGING.

Two Large Steel Boats Added to  
the California List.

[SPECIAL CORRESPONDENCE]

REDLANDS, March 24.—Shipment of the dredger machinery for the Trinity Development Company to Carrville will begin as soon as the roads are in shape. The Southern Pacific Company is soon to bring the equipment from Ohio to Redding, and from this point it will be hauled to the property by wagon.

The monster steel boat will cost about \$250,000 and will be one of the largest dredges in the State. It will operate on Coffee Creek, where an extensive acreage of splendid placer ground has been prospected by the drills. Prospecting of large areas of adjacent territory will commence shortly.

The Valdor Dredging Company has arranged for the immediate building of a dredger on the Trinity River four miles from Junction City. Extensive belts of rich gravel have been demonstrated, and the ground is satisfactory for dredge-mining.

## PLAN ZINC SMELTER.

Construction of a zinc smelter near  
Delamar by the Bully Hill Copper  
Company, will probably commence in  
the early summer, according to news  
received last week from New York.

The plant will use the new process developed by Bully Hill metallurgists, and will probably treat ore from the Adairmont mine, in addition to the other product. The ore from both properties carry much zinc, considerable copper, and some gold and silver.

While no startling new strikes have occurred this week in the district developments are productive of high interest. New projects of much consequence are being started, and the range of exploratory work is constantly enlarging as a result of these.

WRAPPED IN PAPER ARE DOLOMITES  
Fuller's earth, and two other grayish  
samples are low-grade fire clay.

[SPECIAL CORRESPONDENCE]

WILLIAMS (Ariz.) March 24.—Q: The samples are from a ledge close to the place? Do they contain gold or silver?  
A: Free gold absent. Not tested for silver.

White and Brown.  
LOS ANGELES, March 24.—Q: No. 1 white rock said to contain alumina and potash. No. 2 brown rock said to be schistose and vanadium, but possibly barite. Is an informant that deposit is from 700 to 800 feet wide. Both come from the neighborhood of Parker, Ariz. Have either of the samples a commercial value?  
P: Yes.

A: No. 1 is impure alumina, carrying potash low per cent. No. 2 is barite, low grade; copper trace, vanadium absent.

Silicates.  
NEW PINE CREEK (Or.) March 24.—Q: I am a subscriber to your valuable paper.  
T: Yes.

A: No. 1, altered rock; hematite; iron and pseudomorph after pyrite. The blue-black sample is from a silicate with lime and magnesia. Other samples are low-grade dolomite.

Free Gold Trace.  
SANTA BARBARA, March 24.—Q: Sample offered for test is from mountains north of here. Does it contain anything of value commercially? Has it trace of silver?  
A: Microscopical iron disulphide (pyrite) sparingly present. Not tested for silver.

Dolomite.  
NIPTON, March 24.—Q: Please test the five samples of ore and give them mineralogical names.  
M: The one word at heading would cover your five samples. The specimens were loosened in transit. Five of them are of lime and magnesia; traces of zinc, lead, iron and pseudomorph after pyrite. The blue-black sample is from a silicate with lime and magnesia. Other samples are low-grade dolomite.

Ferrous and Ferric Oxides.  
LOS ANGELES, March 24.—Q: (No. 1.) The heavy dyke rock is from Death Valley. Owing to its weight I think it might contain some valuable metal, or nonmetal values, or acid. The blue-black sample is from a silicate with lime and magnesia. Other samples are low-grade dolomite.

LOS ANGELES, March 24.—Q: (No. 2.) A heavy golden concentrate and I had an idea it might be vanadium.  
M: No. 1 is amorphous lead and not very heavy. No. 2 is quartzite, trace of lead and zinc.

Tungsten Absent.  
CIMA, March 24.—Q: Under separate cover please send four samples for test. Will you kindly give qualitative analyses on the specimens, especially sample for tungsten, and give percentage of copper in No. 4?  
MRS. S: A: No. 1, jasper, and the brown yellow matter on coating is silica. No. 2, altered iron oxides, with talcose matter; chrome. No. 3, is quartzite; iron, silica and trace of chrome. No. 4 is made up of brilliant sulphides; copper, approximately 5 per cent.

Platinum Absent.  
LOS ANGELES, March 24.—Q: Inclosed sample of ore from the mountains near Seagov, Cal. Please tell me what the black sand contains. Is there a field test for platinum, and how is it usually found?  
A: Sample carries 34 per cent. magnetite; quartz, garnet, calcite, gypsum, feldspathic matter, hematite, ilmenite and monite in the matrix. In panning "gravel" with water. They are usually very minute in size; light gray in color; streak gray; malachite, greenish white; 14 to 18, acid insoluble in any single acid. Very often the separation of platinum grains is accomplished under the glass and with tweezers. Notwithstanding the fact that the sample is so small, there is a field test for platinum, that given. The best procedure is to concentrate 100 pounds of black sand, for instance, then assay part of the concentrate, and give wet methods to other portions of the concentrate.

Tungsten Absent.  
JOHANNESBURG, March 24.—Q: Local sample. Please report per cent. tungsten.  
Tungsten Trace.

RANDESBURG, March 24.—Q: Am sending two samples from Kern county, sixteen miles north of Mojave. No. 1 is ledge material. No. 2 is concentrates of No. 1. Ledge throws gold and clinbar from talc seam on hanging wall. Is No. 1 favorable ledge material for clinbar, and what is No. 2 sample?  
M: No. 1 and 2 are not indicative of clinbar. No. 1 is altered hematite and still carries hematite (variety micaceous iron); zinc trace; ilmenite and stibnite present; tungstic acid absent. No. 2 carries trace of tungstic acid, but not a trace of tungsten is obtainable from No. 1.

Manganese.  
FOREPAUGH (Ariz.) March 24.—Q: You will find inclosed, from 20-foot shaft, chunks which crumble up when handled.  
A: Wad (bog manganese) pellicular and iron present; not tested for nickel or copper. Approximately 60 per cent. manganese present in samples; sampled together.

High-grade Hematite.  
IVANPAH, March 24.—Q: As I am a reader of The Times will you please tell me what this sample contains?  
B: Yes.

Tellurium Absent.  
LOS ANGELES, March 24.—Q: Is No. 1 pyrolusite? If not, what is it? Has it commercial value? Is tellurium present in No. 2?  
A: Psilomelane nodules sparingly appear in No. 1; lime and silica present. Offer samples to those using manganese. No. 2 is limonite, calcite, chiefly; tremolite present; tellurium absent.

Epidote and Epidoteite.  
LOS ANGELES, March 24.—Q: Kindly advise me if the inclosed ore has any value in minerals and what minerals it contains.  
T: A: The partly polished specimen is epidote. The rock sample carries epidote, quartz and lime-aluminous matter. Not tested for cerium.

Uranium Absent.  
LOS ANGELES, March 24.—Q: Will you please determine the two samples inclosed? I would like to know particularly if they carry vanadium and uranium. From San Bernardino county, No. 1, lead molybdate trace. No. 2, vanadium present, low per cent.

Massive Garnet.  
LOS ANGELES, March 24.—Q: A: Good for abrasive material.

Uranium Absent.  
AGUILA (Ariz.) March 24.—Q: Please let me know if inclosed specimen is uranium ore.  
L: Yes.

Nickel Absent.  
SAN BERNARDINO, March 24.—Q: Is it nickel? From desert, San Bernardino county. Outcrop is about ten feet. Thanking you for this and past favors.  
W: Sample is in part terraced; magnetite and magno pyrite present.

Goldfield.  
WILL DISCUSS YEAR.

Annual Meeting of Consolidated Company Soon to be Held at Wyoming Headquarters—Jumbo Costs to be Lessened.

[SPECIAL CORRESPONDENCE]

GOLDFIELD (Nev.) March 24.—The annual meeting of stockholders of the Goldfield Consolidated Mines Company will be held within a few days at Evansville, Wyo. The company will be incorporated under the laws of that State. Following the meeting, the annual reports of the president and general manager, together with the financial statement of financial conditions, will be given out.

The company has lately established an exploration and investigation department, with offices at San Francisco, in charge of E. A. Julian, for a number of years chief field engineer for the Nevada Consolidated and general manager of the Nevada Hills Company. A representative of this department is now in South America and it will be the purpose of the company to send its engineers to examine sample and report on the various mining properties offered it for sale.

The production of the Jumbo Extension mine in February, according to preliminary estimates just issued, was 2585 tons of ore, with an estimated value of \$79,000. Freight, treatment and sampling costs aggregated \$23,500; melting losses, \$12,000, and total operating costs of \$44,000, leaving a net realization of \$25,000. The company will soon have the advantage of materially reduced rates on freight and treatment, affording a saving of over 15 per cent on ore averaging under 400 tons and effecting savings of fully \$10,000.

Manager Lawrence is continuing the north crosscut, in the shale, and driving shafts to the level of the Goldfield Merger. It is believed that the eastern continuation of the bonanza Jumbo Extension ore channel will be found within a distance of not more than 150 feet from the present breast of the crosscut. Consulting Engineer Garvey has completed his work of surface geology in and about the Merger property and future development work will be planned in accordance with his conclusions. His report will be submitted to the directors in the near future.

Development work continues on the 150 and 160-foot levels of the Atlanta, with quantities of low-grade copper-bearing ore in sight at many points.

Drilling equipment is now on the ground and the Silver Pick management will begin boring operations within a week or ten days. Some of the best surface showings ever recorded in the district has been developed by surface prospecting lately on the property of the Reorganized Cracker Jack Company. Through the reorganization of this company, on the same basis as applied to the property of the exploration of the ground on a comprehensive scale and a capable geologist was employed. A time-consuming and thorough geological analysis of the property.

BRISK SPIRIT PERVADES  
COPPER MINING ACTIVITY.

[SPECIAL CORRESPONDENCE]

SACRAMENTO, March 24.—California copper mining is recording the greatest progress in its history. Eastern capitalists are eagerly searching for good properties, and many new companies are being formed to work deposits of the red metal from Siskiyou in the north to San Bernardino in the south.

One of the most important of recent developments is reported from the Blue ledge district, in the extreme northern section of the State, where arrangements have tentatively been made for acquisition of the famous Blue ledge mines by a strong syndicate of eastern people. The Blue ledge is one of the largest copper properties in California, and has been extensively developed by tunnels, drifts and crosscuts. The ore contains some gold and silver, in addition to an extensive copper content, and is sufficient in size to be blocked out to keep a large smelter operating for years. Lack of smelting and transportation facilities has retarded operations, but it is intended to complete a railroad from the mines to Medford, Or., and erect a smelter at the convenient point.

The Walker mine, near Portola, has been taken under option by New York interests, according to advices from the property. The mine is controlled by the Walker Copper Company of Salt Lake, and has been comprehensively developed. A concentrator of 100 tons capacity per day has been erected, together with an aerial tramway and other equipment.

Four miles west of Jackson, and eight miles north of the Campo Seco mines, an extensive deposit of copper ore has been discovered and is being investigated by engineers of the United States Steel Corporation. Deposits of iron and copper have been known of for several years, but have become sufficiently valuable to justify operations since the advance in price of metals. It is understood the United States Steel people have practically arranged to take over and operate the holdings, popularly known as the Johnson property.

The Queen Regent Mines Company has placed its small smelter in commission on the Wheeler copper group at Spenceville, between Grant Valley and Marysville. The plant is slated to be making an excellent extraction of copper and gold, and its capacity will probably be increased in the summer.

ARIZONANS LEASE MINE.  
Plan Large Developments of San Bernardino County Property.

The Baker copper property, in San Bernardino county, has just been leased to Arizona capitalists who plan to prosecute an active campaign of development.

This property is located thirteen miles north of Vidal, on the Parker out-crop of the Santa Fe Railroad. Big ledges of high grade ore are in evidence and shipments have been made. The lessors will at once begin operations on a large scale.

W. E. Hawley, a prominent mining man of Douglas, Ariz., is the lessee. Henry Bowling of the Cananea company will be the engineer in charge of the work.

The D. and W. Mining Company, owning adjacent ground is operating on a large scale, and the National in the same vicinity, has a large showing of copper, gold and silver.

The proper, together with the Gold Reef, regarding which interesting news was published last week, constitute a sufficient showing to prove the Baker property, and is rapidly coming into the limelight with the renewal of mining activity in the Southwest.

TUCSON.  
AIDING INSTITUTION.

Copper Interests Give Strong Support to Mining Department of State University—Fluorine Group of Claims is Bonded by Eastern Company.

[SPECIAL CORRESPONDENCE]

TUCSON (Ariz.) March 25.—Despite adverse legislation, it would appear that the great copper producing corporations of Arizona have not lost faith in the future of the State, for they have assessed themselves \$100,000, to be added to \$75,000 appropriated by the last Legislature, toward the erection at the State University of a School of Mines Building. The Copper Queen long ago fitted up a mechanical and metallurgical laboratory at its own expense in the University and almost every year has handsomely shown its interest in the institution.

Johnson, north of Dragoon station, a district appreciated as rich, has had hard luck in the past but now seems to be coming into its own. The price of copper, being favorable, large ore shipments are being made. And the Keystone mine a fine holding plant has been installed.

The Fluorine group, three miles from Pearce, has been bonded for \$150,000 by an eastern company, representing C. A. P. Brown of Courtland. The main values are in gold, carried in quartz, and it is proposed to market the ore to smelters, rather than to mill it on the ground. Just at present there is a strong demand for silicious ores for fluxing.

The new vein in Sandstorm-Kendall opened by the west crosscut, on the 700-foot level, is being explored by drift, extending north from the crosscut, and is showing seams of good ore, typical in character of the rich veins found in the producing mines of the district.

Great interest has been aroused in mining circles by the completion of two flotation plants in the Goldfield district. Elaborate tests have already established, to the satisfaction of metallurgists of high standing, the success of the process as applied to the treatment of the refractory ores of the Goldfield district, and all that remains is the proper adjustment of the equipment and the regulation or application of the oils best suited to the ore.

Of almost equal interest to mining men of the district are the preparations for employing core drills for prospecting at great depth.

"Take Time by the Forelock,"
